HydraMaster 000-163-603GL Add On Assembly GARDEN REEL 2 LIVE

Manufacturer: HydraMaster

HydraMaster 000-163-603GL Add-On Garden Hose Reel Assembly & Live Garden Hose Reel for HydraCradle

Manufacturer: HydraMaster

Part Number: 000-163-603GL

Product Description: Add-On Garden Hose Reel Assembly & Live

Product Type: Optional Garden Hose Reel Assembly

Application: HydraMaster HydraCradle Fresh Water Tank System

Product Overview

The HydraMaster 000-163-603GL Add-On Garden Hose Reel Assembly is designed for use with the HydraMaster HydraCradle fresh water tank system.

This optional hose reel assembly provides an additional garden hose storage location, allowing operators to organize and manage water supply hoses on their truckmounted carpet cleaning equipment.

The live hose reel design incorporates a rotating water connection, allowing water to flow through the hose while the hose remains partially or fully wound onto the reel.

This provides convenient hose management during equipment setup, operation, and storage.

Features and Benefits

- Live Hose Reel Design: Allows water to flow through the reel's rotating connection without requiring the entire hose to be unwound.
- Additional Hose Storage: Provides an additional reel position for organizing garden hoses used with truckmounted cleaning equipment.
- HydraCradle Application: Designed for installation with compatible HydraMaster HydraCradle fresh water tank configurations.
- Convenient Hose Management: Helps keep water supply hoses organized and accessible during equipment operation.
- OEM HydraMaster Assembly: Manufacturer-designated replacement or add-on assembly for the applicable HydraMaster equipment configuration.

Garden Hose / Fresh Water Supply

Equipment Application
HydraMaster HydraCradle

Installation
Optional Add-On Hose Reel

Brand
HydraMaster

Understanding Live vs. Non-Live Hose Reels

A live hose reel incorporates a rotating water connection that allows water to pass through the hose while the reel turns.

This allows the operator to use the water supply hose without completely removing the hose from the reel.

A non-live hose reel is primarily intended for hose storage and does not provide the same continuous water connection through the rotating reel.

HydraCradle Hose Reel Installation

The HydraMaster HydraCradle system can accommodate multiple hose reel configurations depending on the equipment arrangement and optional accessories installed.

Additional garden hose reels provide convenient storage and access to fresh water supply hoses used in professional carpet cleaning and restoration applications.

Important Product Image Information

Illustration Note: The product illustration shows the optional hose reel installed on a HydraMaster HydraCradle system. The highlighted dark-colored hose reel identifies the add-on reel location. The gray-colored tank, mounting structure, and additional hose reels are shown for installation reference only and are not included with this add-on reel assembly.
