HydraMaster 000-079-134 Kubota 2000 PSI High Pressure Washing Upgrade Kit for Truckmount Carpet Cleaning Machines

Model Number: 000-079-134

HydraMaster 000-079-134 Kubota 2000 PSI High Pressure Washing Upgrade Kit for Truckmount Carpet Cleaning Machines

Manufacturer: HydraMaster

HydraMaster 000-079-134 Kubota 2000 PSI High Pressure Washing Upgrade Kit

Manufacturer: HydraMaster

OEM Part Number: 000-079-134

Manufacturer Description: KIT, KUBOTA 2000 PSI PRESSURE WASHING

Product Type: Truckmount Pressure Washing Upgrade Kit

Maximum Pressure Capability: 2000 PSI

Application: Compatible Kubota-Powered HydraMaster Truckmount Cleaning Machines

Convert Your HydraMaster Truckmount for High Pressure Washing

The HydraMaster 000-079-134 Kubota 2000 PSI Pressure Washing Upgrade Kit is an OEM accessory designed to provide high-pressure washing capability on compatible Kubota-powered HydraMaster truckmount cleaning systems.

Many professional truckmount carpet cleaning machines are designed primarily for carpet, upholstery, and hard surface extraction. Adding high-pressure washing capability allows operators to expand the applications of their existing equipment. With the appropriate HydraMaster upgrade, compatible equipment can operate at pressures up to 2000 PSI, providing additional cleaning capabilities without requiring a completely separate pressure washing machine.

This upgrade is particularly useful for professional cleaning contractors who want to expand their service offerings while continuing to use their existing truckmount equipment.

Potential Cleaning Applications

- Commercial hard surface cleaning
- Concrete and exterior surface cleaning
- Equipment and machinery washing
- Commercial vehicle and fleet cleaning
- Garage and workshop floor cleaning
- Industrial maintenance cleaning
- Other pressure washing applications within the equipment manufacturer's operating specifications

Important: Cleaning performance depends on the truckmount model, installed components, available water flow, operating temperature, and the pressure rating of the accessories being used.

HydraMaster 000-079-134 Kubota 2000 PSI High Pressure Washing Upgrade Kit for Truckmount Carpet Cleaning Machines

HydraMaster manufactures several truckmount cleaning systems equipped with Kubota engines.

This kit is identified by HydraMaster as a Kubota 2000 PSI pressure washing upgrade. Compatibility must be confirmed using the truckmount model and serial number.

Important Compatibility Notice: Not every Kubota-powered HydraMaster truckmount necessarily uses the same pressure washing conversion components.

HydraMaster also identifies part 000-079-126 as a separate Titan 575 2000 PSI pressure washing kit. These part numbers should not be assumed interchangeable without manufacturer verification.

Before Ordering: Please provide your HydraMaster machine model and serial number so that the correct pressure washing upgrade kit can be verified.

Manufacturer Manuals, Diagrams and Documentation

The following HydraMaster manufacturer documents provide information about Kubota-powered truckmount systems, pressure washing capabilities, water flow diagrams, operating pressures, and related equipment components.

1. HydraMaster Titan 575 Kubota Owner's Manual

This archived manufacturer manual covers the Kubota-powered Titan 575 truckmount. It is useful for researching the machine's pressure washing system, plumbing, controls, and service components.

Frequently Asked Questions

What does HydraMaster 000-079-134 do?

This OEM upgrade kit is intended to provide 2000 PSI pressure washing capability on compatible Kubota-powered HydraMaster truckmount cleaning machines.

Will this kit work on every HydraMaster truckmount with a Kubota engine?

Not necessarily. HydraMaster has produced multiple truckmount configurations. Compatibility should be verified using the exact model and serial number.

Does this kit include a pressure washing gun, wand, hose, and spray nozzles?

The exact contents of kit 000-079-134 must be confirmed with HydraMaster. Do not assume that external pressure washing accessories are included unless they are specifically identified in the manufacturer's packing list.

Can this upgrade produce hot water?

Available water temperature depends on the specific HydraMaster truckmount, its heat exchanger system, and the manufacturer's approved operating configuration. This kit should not be interpreted as a standalone water heater.

Is professional installation required?

Professional installation is recommended because high-pressure plumbing, pressure controls, and safety-related components may require modification or adjustment.

Important Installation and Safety Information

Installation and operation should follow HydraMaster's instructions for the specific truckmount model.

- Confirm compatibility before ordering.
- Use hoses, fittings, and accessories rated for the intended pressure and temperature.
- Do not exceed the manufacturer's maximum permitted operating pressure.
- Verify that pressure regulation and safety components operate correctly.
- Inspect the existing pump and high-pressure plumbing before upgrading.
- Use appropriate personal protective equipment during pressure washing.

Notice: A 2000 PSI pressure washing system can cause serious injury or property damage if improperly installed or operated.

Order Genuine HydraMaster Replacement Parts and Accessories

Steam-Brite supplies professional cleaning equipment, truckmount replacement parts, pressure washing accessories, and OEM HydraMaster components.

When ordering HydraMaster 000-079-134, please verify your equipment model and serial number to help ensure the correct upgrade is selected.
