Part Number Without Dashes: 000078560

Manufacturer Description: KIT, PARTS PACKAGE XL 575

Additional OEM Description: KIT, PARTS PACKAGE XL 625

Equipment Applications: HydraMaster Titan 575 and Titan 625 Truckmount Carpet Cleaning Machines

Product Type: OEM Parts Package / Truckmount Equipment Parts Kit

HydraMaster 000-078-560 OEM XL Parts Package

The HydraMaster 000-078-560 Parts Package XL 575 is an original equipment manufacturer (OEM) parts package associated with HydraMaster truckmounted carpet cleaning equipment. This factory-designated kit is referenced in HydraMaster equipment documentation for the Titan series of professional truckmount cleaning machines.

HydraMaster identifies part number 000-078-560 as the XL 575 Parts Package. Interestingly, the same manufacturer part number also appears in the HydraMaster Titan 625 owner's manual under the description XL 625 Parts Package. This cross-reference is useful for equipment owners, professional carpet cleaning companies, truckmount installers, equipment repair facilities, and service technicians searching for the correct factory parts package.

Truckmount Installation and Equipment Parts Package

Professional truckmounted carpet cleaning machines require proper installation, mounting, and connection to supporting equipment. Depending on the truckmount configuration, installation can involve mounting hardware, brackets, hoses, fittings, and other specialized components.

The HydraMaster 000-078-560 is listed by the manufacturer as a parts package included in the Titan 625 complete machine assembly.

Important: Although this kit appears to be associated with the complete truckmount equipment package and may contain installation-related components, the exact contents have not been independently verified. Customers should confirm the factory packing list with Steam-Brite before ordering if specific mounting bolts, brackets, hoses, fittings, or other components are required.

The Titan 575 factory manual provides additional equipment illustrations, service information, and parts references useful for identifying components associated with the truckmount.

Common Applications

HydraMaster OEM parts packages may be needed when servicing, restoring, relocating, or preparing compatible truckmounted cleaning equipment.

Potential applications for the 000-078-560 parts package include:

- HydraMaster Titan 575 truckmount equipment projects.
- HydraMaster Titan 625 truckmount equipment projects.
- Replacement of a missing original factory parts package.
- Truckmount equipment installation preparation, subject to verification of kit contents.
- Truckmount relocation or reinstallation projects.

Parts & Accessories > Van Accessories/Holders > HydraMaster 000-078-560 Titan 575 / Titan 625 XL Parts Package Kit " Truckmount Installation Hardware & Accessories

HydraMaster 000-078-560 Titan 575 / Titan 625 XL Parts Package Kit " Truckmount Installation Hardware & Accessories

- Professional carpet cleaning equipment service and restoration.
- OEM parts identification and equipment maintenance planning.

Before ordering: Verify that the complete factory parts package contains the specific components required for your project. This listing is for the manufacturer-designated parts package, not necessarily a complete truckmount installation system.

Frequently Asked Questions

What is HydraMaster part number 000-078-560?

HydraMaster 000-078-560 is an OEM parts package identified as KIT, PARTS PACKAGE XL 575. The same part number is also listed as KIT, PARTS PACKAGE XL 625 in the manufacturer's Titan 625 equipment documentation.

Does HydraMaster 000-078-560 fit the Titan 575?

The manufacturer's XL 575 parts package description identifies this part number with the Titan 575 equipment family. Customers should verify the required package against their specific equipment model and serial number.

Is HydraMaster 000-078-560 also used on the Titan 625?

Yes. The HydraMaster Titan 625 owner's manual identifies OEM part number 000-078-560 as item 9, KIT, PARTS PACKAGE XL 625, quantity one, in the Titan 625 With 70 Gallon URT assembly parts list.

Does this kit include the bolts needed to mount a truckmount in a van?

The package may include installation-related components, but the manufacturer's complete packing list has not been verified. Mounting bolts, washers, brackets, and other specific hardware should not be assumed to be included without confirmation.

Is this a maintenance or rebuild kit?

HydraMaster describes this item as an XL parts package rather than a specific engine, pump, blower, or heat exchanger rebuild kit. The manufacturer's available equipment assembly reference does not establish the exact contents.

Can I use this package when installing a used Titan 575 or Titan 625?

This OEM parts package may be relevant when preparing or reinstalling compatible HydraMaster truckmount equipment. However, customers should confirm the package contents and compare them with the installation requirements for their particular machine.

Can I purchase individual components instead of the complete kit?

Individual replacement components may be available separately depending on the manufacturer's parts breakdown and current availability. Contact Steam-Brite with the required component description, equipment model, and serial number for assistance.

Why Order HydraMaster Replacement Parts From Steam-Brite?

Steam-Brite supplies professional carpet cleaning equipment, truckmount components, pressure washing equipment, cleaning accessories, and replacement parts for commercial cleaning professionals.

We assist customers with locating OEM part numbers, identifying replacement components, and researching factory parts diagrams for professional cleaning equipment.
