HydraMaster 000-159-134 Replacement Rotomold 125 Gallon Tank Reels and Frame Not Included

Manufacturer: HydraMaster

HydraMaster 000-159-134 125 Gallon Poly Fresh Water Replacement Tank for HydraCradle

Genuine HydraMaster OEM Replacement Part #000-159-134

The HydraMaster 000-159-134 is a 125-gallon polyethylene freshwater replacement tank designed for the HydraMaster HydraCradle water storage system used in professional truckmount carpet cleaning equipment installations.

This replacement tank is intended for customers who already own a HydraCradle system and need to replace the original freshwater storage tank without purchasing an entirely new HydraCradle assembly.

Product Specifications

- Manufacturer: HydraMaster
- OEM Part Number: 000-159-134
- Factory Description: TANK, FRESH WATER 125 GAL POLY CRADLE
- Capacity: 125 US Gallons
- Material: Polyethylene (Poly)
- Application: HydraMaster HydraCradle Freshwater Storage System
- Product Type: Replacement Freshwater Tank
- Equipment Application: Professional Truckmount Carpet Cleaning Systems

Replacement Tank Only - Not a Complete HydraCradle Assembly

Important: HydraMaster part number 000-159-134 identifies the 125-gallon freshwater tank itself. It should not be confused with a complete HydraCradle freshwater storage and hose reel assembly.

The complete HydraCradle system incorporates additional components that are identified separately in HydraMaster factory parts diagrams, including:

- Tank mounting brackets and hardware
- Freshwater transfer pump
- Water valves and plumbing connections
- Electric hose reel components
- Hose reel drive motor and mounting hardware
- Tank covers and associated accessories

These additional components are not included unless specifically identified as supplied with this replacement tank.

HydraMaster HydraCradle Freshwater Storage System

The HydraMaster HydraCradle system combines freshwater storage with convenient hose management for professional carpet cleaning and restoration vehicles.

Its 125-gallon freshwater capacity allows cleaning contractors to carry a substantial onboard supply of water for jobs where a convenient external water connection may

HydraMaster 000-159-134 Replacement Rotomold 125 Gallon Tank Reels and Frame Not Included

not be available.

The HydraCradle design helps cleaning contractors organize their truckmount installation by combining freshwater storage and hose storage in a compact equipment arrangement.

Applications

- Truckmount carpet cleaning equipment
- HydraMaster HydraCradle freshwater systems
- Commercial carpet cleaning vehicles
- Professional upholstery cleaning equipment installations
- Truckmount equipment maintenance and restoration
- Replacement of damaged or leaking HydraCradle water tanks

Factory Parts Diagram Reference

HydraMaster identifies part number 000-159-134 as the 125-gallon freshwater tank in the factory HydraCradle assembly parts breakdown.

The HydraMaster CDS 4.6/4.8 service manual also identifies this component as Item #1 in the 125-Gallon HydraCradle Tank Assembly.

Important Ordering Information

This listing is for the HydraMaster 000-159-134 replacement freshwater tank, not the complete HydraCradle system.

Verify the original equipment part number against the HydraMaster factory parts diagram before ordering.

Order by part number, not by image. The manufacturer reserves the right to change product appearance, materials, specifications, and component design without notice. Do not allow water to freeze inside the tank. Freezing water can expand and damage polyethylene water storage tanks and associated plumbing.
