Clean Storm 20261112 Clear View Upholstery Pro 4" Bi-Directional Cleaning Wand
Ships after Jan 3rd, 2027
Professional Upholstery Extraction Tool for Truckmounts and Portable Carpet Cleaning Machines
The Clean Storm 20261112 Clear View Upholstery Pro is a professional upholstery cleaning wand designed for use with hot water extraction equipment, including truckmounted carpet cleaning systems and compatible portable carpet extractors. Featuring a transparent cleaning head, bi-directional solution delivery and vacuum recovery, adjustable solution flow, and a comfortable ergonomic design, this tool provides professional cleaners with an alternative to traditional upholstery cleaning wands.
The clear cleaning head allows the operator to observe the cleaning process while the dual vacuum extraction slots permit cleaning in both forward and backward directions.
Key Features and Benefits

- Bi-Directional Cleaning: Dual vacuum extraction slots allow the technician to clean upholstery using forward and backward cleaning strokes.
- Clear View Cleaning Head: Transparent construction allows the operator to observe solution movement and extraction during cleaning.
- 4-Inch Cleaning Width: Designed for efficient cleaning of upholstered furniture, cushions, automotive interiors, and other water-cleanable fabric surfaces.
- Adjustable Solution Flow: A needle-style flow control valve allows the technician to regulate the amount of cleaning solution delivered to the fabric.
- Brass Trigger Valve: Features a brass solution control valve with a manually operated trigger lever. The trigger does not include a continuous-operation locking mechanism.
- 1-1/2" Vacuum Hose Connection: The tool features a standard-size 1-1/2-inch inside diameter vacuum hose cuff connection rather than the expanded 2-inch AH46-style cuff found on certain other upholstery tools.
- Lightweight Composite Construction: The reinforced composite body provides a lightweight design for extended upholstery cleaning applications.
- Internal Solution Delivery: Cleaning solution is delivered within the cleaning head, helping control overspray during normal operation.
- Ergonomic Handheld Design: Comfortable grip and compact cleaning head help technicians maneuver around furniture, cushions, and confined areas.
- Truckmount and Portable Compatibility: Designed for use with compatible professional extraction systems. Operating pressure and vacuum connections must be appropriate for the tool.

Technical Specifications

,Clean Storm 20261112 Clear View Upholstery Pro 4in Bi-Directional Cleaning Wand Truckmount Portable Extractor

Brand

Maximum Working Pressure
500 PSI - Manufacturer Published Rating; Confirm for This Configuration

Equipment Compatibility
Compatible Truckmounts and Portable Carpet Extractors

Applications
Upholstery, Furniture, Automotive Interiors, RV Interiors

Manufacturer
FUMEIJING

Bi-Directional Upholstery Cleaning
Unlike traditional upholstery cleaning tools that are primarily designed for cleaning in one direction, the Clean Storm Clear View Upholstery Pro features two vacuum recovery slots with the solution delivery system positioned between them.
This arrangement allows the operator to move the tool forward and backward across upholstery while maintaining vacuum recovery.
The design can help reduce unnecessary repositioning of the tool during professional upholstery cleaning.
Adjustable Water Flow for Different Fabrics
The adjustable needle valve allows the operator to regulate solution delivery based on the cleaning application.
Lower solution flow settings may be desirable when cleaning delicate water-cleanable upholstery or when using portable extractors with lower water recovery capacity.
Higher flow settings may be appropriate for heavily soiled upholstery when the extraction equipment provides adequate vacuum recovery.
Important: The flow adjustment controls solution volume. It does not replace a pressure regulator on the extraction machine.
1-1/2" Vacuum Hose Connection
One important difference between the Clean Storm 20261112 and certain other clear upholstery tools is the vacuum hose connection.
The Clean Storm version features a 1-1/2-inch inside diameter vacuum hose cuff connection.
This differs from the expanded AH46-style 2-inch inside diameter vacuum hose cuff used on the Sapphire Scientific Upholstery Pro.
Customers should verify their existing vacuum hose connection before ordering.
Additional adapters may be required depending on the equipment and hose configuration.
Brass Trigger Valve and Flow Control

Steambrite Supply

,Clean Storm 20261112 Clear View Upholstery Pro 4in Bi-Directional Cleaning Wand Truckmount Portable Extractor

The Clean Storm 20261112 features a brass manually operated solution trigger valve. This valve is a different design from the Production Metal Forming PMF RV4N valve used on some professional upholstery tools.
Important: This model does not include a trigger-lock feature to hold the solution lever in the depressed position.
The adjustable flow control needle valve is exposed and does not include a hook-and-loop protective wrap or cover.
Common Cleaning Applications

- Residential sofas and couches
- Commercial upholstered furniture
- Fabric recliners and chairs
- Automotive cloth upholstery
- RV and motorhome interiors
- Fabric furniture cushions
- Commercial office seating
- Other suitable water-cleanable fabrics

Always verify upholstery cleaning codes and test for colorfastness before performing wet extraction.
Compatible Cleaning Equipment
The Clean Storm Clear View Upholstery Pro is intended for use with professional hot water extraction equipment, including compatible:

- Truckmounted carpet cleaning machines
- Portable carpet cleaning extractors
- Professional upholstery extractors
- Automotive detailing extractors

Equipment must provide appropriate solution pressure, solution connections, and vacuum recovery.
The tool does not independently generate vacuum or water pressure.
Comparison With Sapphire Scientific Upholstery Pro
The Clean Storm 20261112 shares several general design characteristics with the Sapphire Scientific Clear Upholstery Pro, including a transparent cleaning head and bi-directional extraction.
However, these are independently manufactured products with different components and connection configurations.
