Clean Storm 20261110 Air Duct Cleaning Machine 120V Dual Cord 2400W HEPA Vacuum Camera LED Lights 15M Hose 4 Brushes

Model Number: 20261110

Clean Storm 20261110 Air Duct Cleaning Machine 120V Dual Cord 2400W HEPA Vacuum Camera LED Lights 15M Hose 4 Brushes

Manufacturer: Clean Storm

Clean Storm 20261110 Professional Air Duct Cleaning Machine
120 Volt Dual Power Cord | 2400 Watts | HEPA Vacuum | Inspection Camera | 50 foot / 15 Meter Hose | 4 Cleaning Brushes
Ships after 2026-01-02; Preorder now
The Clean Storm 20261110 Professional Air Duct Cleaning Machine is an electric HVAC duct cleaning system designed for professional air duct cleaning, ventilation system maintenance, and removal of accumulated dust and debris from residential and commercial ductwork.
This complete duct cleaning package combines a powered rotary brush cleaning system, integrated vacuum collection, HEPA filtration, and an inspection camera with LED lighting.
Unlike many imported duct cleaning machines designed for 220-240 volt electrical service, this specially configured Clean Storm model operates on 120 volt AC power using two separate power cords. The dual-cord configuration distributes the electrical load between two power connections.
Total Rated System Power: 2400 Watts
Key Features and Benefits

- 120 Volt Operation: Specially configured for the North American 120V electrical system.
- Dual Power Cord Design: Two separate 120V power cords distribute the electrical load instead of requiring one high-amperage power connection.
- 2400 Watts Total Power: High-powered electric cleaning and vacuum system designed for professional HVAC duct cleaning applications.
- Integrated HEPA Vacuum Filtration: Vacuum collection system helps capture dust and debris removed during duct cleaning.
- Inspection Camera with LED Lighting: Allows the operator to view the interior of the ductwork during cleaning operations.
- Built-In Video Display: Monitor the cleaning process using the machine's integrated viewing screen.
- 15 Meter Cleaning Hose: Approximately 49.2 feet of hose provides extended reach into ventilation systems.
- Four Cleaning Brushes Included: Multiple brush sizes provide versatility when cleaning different duct dimensions.
- Rotary Brush Cleaning: Mechanical brushing helps loosen accumulated dust, lint, dirt, and other deposits inside HVAC ductwork.
- Professional Mobile Design: Equipment housing is designed for transportation between cleaning locations.

Clean Storm 20261110 Air Duct Cleaning Machine 120V Dual Cord 2400W HEPA Vacuum Camera LED Lights 15M Hose 4 Brushes

Clean Storm 20261110 Technical Specifications

Brand
Clean Storm

Model
20261110

Equipment Type
Professional HVAC Air Duct Cleaning Machine

Operating Voltage
120 Volts AC

Power Connection
Dual 120V Power Cords

Total Rated Power
2400 Watts

Vacuum System
Integrated Electric Vacuum

Vacuum Filtration
HEPA

Camera
Integrated Duct Inspection Camera

Camera Lighting
LED

Steambrite Supply

Clean Storm 20261110 Air Duct Cleaning Machine 120V Dual Cord 2400W HEPA Vacuum Camera LED Lights 15M Hose 4 Brushes

Video Monitor
Built-In Display

Cleaning Hose Length
15 Meters / Approximately 49.2 Feet

Included Cleaning Brushes
4

Primary Application
HVAC Air Duct and Ventilation System Cleaning

Dual 120 Volt Power Cord Design
One of the most important advantages of the Clean Storm 20261110 is its dual 120V electrical configuration.
Many professional air duct cleaning machines are manufactured for international 220V or 240V electrical systems. This version has been specially configured for 120V operation in the United States.
The machine uses two separate power cords to distribute its total electrical demand.
Important Electrical Information: The machine's total rated power is 2400 watts. Each power cord must be connected to an appropriately rated 120V electrical circuit. The required circuit configuration, individual cord amperage, and plug specifications should be verified before operation.
Integrated Inspection Camera with LED Lights
The integrated inspection camera provides a view inside the ductwork while the cleaning brush is operating.
LED illumination improves visibility in dark ventilation passages, allowing the operator to monitor brush movement and inspect accessible areas of the duct system.
The built-in viewing display eliminates the need for a separate handheld inspection monitor during normal operation.
HEPA Vacuum Dust Collection
The integrated vacuum system collects loosened dust and debris as the rotary brushes clean the interior surfaces of the ductwork.
HEPA filtration is designed to capture fine airborne particles passing through the filtration system.
The combination of mechanical brushing and vacuum collection helps reduce the amount of loosened debris remaining inside the ductwork.
15 Meter Hose for Extended Cleaning Reach

Steambrite Supply

Clean Storm 20261110 Air Duct Cleaning Machine 120V Dual Cord 2400W HEPA Vacuum Camera LED Lights 15M Hose 4 Brushes

The included 15 meter (approximately 49.2 foot) hose provides extended cleaning reach for residential and commercial ventilation systems.
The flexible hose allows the operator to guide the cleaning assembly through accessible ductwork while the machine remains outside the duct opening.
Four Cleaning Brushes Included
The Clean Storm 20261110 package includes four cleaning brushes for use with different duct sizes and cleaning applications.
Rotating brush bristles help dislodge dust, lint, and accumulated debris from interior duct surfaces.
Always select a brush appropriate for the duct dimensions and construction material.
Common Applications

- Residential HVAC air duct cleaning
- Commercial ventilation duct maintenance
- Air conditioning supply duct cleaning
- Heating system duct cleaning
- Return air duct cleaning
- Ventilation system inspection
- Professional HVAC maintenance services
- Air duct cleaning contractor equipment

What's Included with the Clean Storm 20261110?

- 1 - Clean Storm 20261110 Air Duct Cleaning Machine
- 2 - 120 Volt Power Cords
- 1 - Integrated HEPA Vacuum System
- 1 - Inspection Camera with LED Lighting
- 1 - Built-In Video Display
- 1 - 50 ft / 15 Meter Hose
- 4 - Air Duct Cleaning Brushes

Professional HVAC Duct Cleaning Equipment
The Clean Storm 20261110 is designed for professional cleaning contractors, HVAC service companies, property maintenance businesses, and restoration contractors seeking an integrated air duct cleaning system.
Combining powered brushing, vacuum collection, HEPA filtration, and camera-assisted inspection in one machine can reduce the need to transport multiple separate pieces of equipment.
