Equipment: Air Duct Cleaning Machines > Cable Driven Air Duct Systems > Clean Storm 20261119 Professional 33 Ft (10 Meter) Drill Powered Air Duct, Dryer Vent & Chimney Cleaning Kit | 8 Brush Heads | Flexible Cable Drive System

Clean Storm 20261119 Professional 33 Ft (10 Meter) Drill Powered Air Duct, Dryer Vent & Chimney Cleaning Kit | 8 Brush Heads | Flexible Cable Drive System

Model Number: 20261119

Clean Storm 20261119 Professional 33 Ft (10 Meter) Drill Powered Air Duct, Dryer Vent & Chimney Cleaning Kit | 8 Brush Heads | Flexible Cable Drive System

Manufacturer: Clean Storm

Clean Storm 20261119 Professional Air Duct, Dryer Vent & Chimney Cleaning Kit
33 Ft (10 Meter) Flexible Cable Drive System with 8 Interchangeable Cleaning Heads
Shipping after 1/15/2027
One Professional Cleaning System for Multiple Applications!
The Clean Storm 20261119 is a versatile, drill-powered rotary cleaning system designed for cleaning HVAC air ducts, dryer vents, chimney flues, and other compatible ductwork.
This complete system includes a 33-foot (10-meter) flexible rotary drive cable, five nylon brushes, and three heavy-duty steel wire cleaning attachments to tackle everything from routine dust removal to more aggressive cleaning applications.
Simply connect the flexible drive cable to a compatible electric drill, install the appropriate cleaning attachment, and begin rotary brushing.
The flexible cable design allows the rotating brush to travel through ductwork while accommodating bends and changes in direction.

What Is Included?
1. Flexible Rotary Drive Cable

- Length: 10 meters (approximately 32.8 feet)
- Drive Cable Diameter: Approximately 14 mm
- Power Source: Customer-supplied electric drill
- Drive Connection: Hex shank for compatible drill chucks
- Brush Connection: Threaded interchangeable attachment system
- Construction: Flexible cable designed to transmit rotary motion through ductwork

The flexible rotary cable allows technicians to clean longer duct runs without purchasing a dedicated electric brush-driving machine.
2. Five Interchangeable Nylon Cleaning Brushes

Brush Diameter
Brush Color
Suggested Applications

Clean Storm 20261119 Professional 33 Ft (10 Meter) Drill Powered Air Duct, Dryer Vent & Chimney Cleaning Kit | 8 Brush Heads | Flexible Cable Drive System

100 mm (3.9")
Black or Blue
Clothes Dryer, Small ducts, narrow openings, and confined spaces

300 mm (11.8")
Black
Medium ductwork and general cleaning

400 mm (15.7")
Blue
Medium to large HVAC ducts

500 mm (19.7")
Blue
Larger ductwork and ventilation systems

600 mm (23.6")
Blue
Large air ducts and ventilation passages

Why Nylon Brushes?
Nylon bristles provide a flexible brushing action suitable for many routine duct-cleaning applications. They help loosen accumulated dust, lint, and debris without the aggressive scraping action of steel wire attachments.
Important: Select the appropriate brush diameter and bristle stiffness for the duct material. Nylon brushes are not guaranteed to be safe for every duct surface, particularly fragile flexible duct liners.
3. Three Heavy-Duty Steel Wire Cleaning Heads

Steambrite Supply

Clean Storm 20261119 Professional 33 Ft (10 Meter) Drill Powered Air Duct, Dryer Vent & Chimney Cleaning Kit | 8 Brush Heads | Flexible Cable Drive System

200 mm (7.9")
Steel Wire
Smaller compatible metal passages

400 mm (15.7")
Steel Wire
Medium compatible metal ducts and flues

600 mm (23.6")
Steel Wire
Larger compatible metal ducts and flues

Unlike conventional nylon brushes, these attachments use flexible steel wire arms to provide a more aggressive cleaning action.
They are intended for applications requiring additional mechanical agitation to loosen stubborn deposits from suitable metal surfaces.
Warning: Steel wire attachments can damage duct liners, flexible ducts, coatings, and other surfaces. Chimney and flue cleaning must be performed only where the equipment is compatible with the specific flue construction. Do not use steel wire heads on stainless steel chimney liners unless expressly approved by the liner manufacturer.

One Cleaning System - Multiple Applications
HVAC Air Duct Cleaning
Remove accumulated dust and debris from compatible residential and commercial HVAC ductwork.
Choose from five nylon brush diameters to accommodate different duct sizes.
Dryer Vent Cleaning
Rotary brushing can help loosen accumulated dryer lint from suitable dryer exhaust ductwork.
Use an appropriately sized brush and verify that the brush and cable can safely pass through the duct without damaging connections or becoming lodged.
Chimney and Flue Cleaning
The included steel wire attachments provide additional agitation for certain heavy-duty cleaning applications.

Clean Storm 20261119 Professional 33 Ft (10 Meter) Drill Powered Air Duct, Dryer Vent & Chimney Cleaning Kit | 8 Brush Heads | Flexible Cable Drive System

Always verify compatibility with the chimney or flue material before use. Removing combustible creosote deposits may require specialized equipment and professional inspection.
Commercial Exhaust and Ventilation Ducts
The interchangeable attachments make this system useful for various compatible commercial ventilation and metal duct-cleaning applications.
Heavy grease deposits and regulated commercial kitchen exhaust systems may require specialized cleaning procedures and equipment.

Advantages of the Clean Storm 20261119

- 33-Foot Reach: Approximately 10 meters of flexible rotary cable.
- Eight Cleaning Heads: Five nylon brushes and three steel wire attachments.
- Drill Powered: Eliminates the need for a dedicated brush drive motor.
- Multiple Brush Sizes: Accommodates a wide variety of compatible duct dimensions.
- Flexible Drive Cable: Designed to navigate bends more easily than rigid drive rods.
- Interchangeable Attachments: Change cleaning heads for different applications.
- Professional Versatility: Suitable for appropriately trained HVAC, ventilation, and restoration cleaning technicians.
- Compact Equipment Package: Convenient for transporting between cleaning jobs.

Flexible Cable Drive vs. Solid Core Drive Systems
Not all rotary duct-cleaning systems operate the same way.
Flexible Cable Systems: Use a flexible drive assembly designed to transmit rotation while accommodating bends and changes in duct direction.
Solid Core Drive Systems: Typically use a more rigid drive rod that may offer advantages in straight duct runs but can be more difficult to maneuver through tight bends.
The Clean Storm 20261119 offers a flexible cable configuration for technicians who need to navigate ductwork with changes in direction.

Frequently Asked Questions
Q: Does this cleaning system require a special motor?
A: No. The system is designed to be powered by a compatible electric drill using its hex-shank drive connection. The drill is not included. Set clutch on drill to prevent cable breakage.
Q: Can I use this equipment to clean rectangular air ducts?
A: The flexible cable and interchangeable brushes may be used in compatible rectangular ductwork. However, a rotating round brush may not reach every corner.

Clean Storm 20261119 Professional 33 Ft (10 Meter) Drill Powered Air Duct, Dryer Vent & Chimney Cleaning Kit | 8 Brush Heads | Flexible Cable Drive System

Additional cleaning methods may be required.
Q: Can this equipment operate in reverse?
A: No
Q: Can I use the steel wire attachments on any chimney?
A: No. Always verify compatibility with the chimney construction and liner material. Aggressive steel wire attachments may damage certain chimney liners and coatings.
Q: Can I clean flexible dryer vent hose?
A: Rotary cleaning attachments should not be used on fragile foil or plastic flexible ducting. Damaged or unsuitable dryer exhaust ducting should be replaced with code-compliant materials. Inspect before attempting cleaning.
Q: Does the kit include a vacuum system?
A: No. This is a rotary brushing and agitation system. A separate suitable vacuum or debris collection system may be required to remove loosened contaminants.
Q: Are replacement brushes interchangeable?
A: All eight supplied attachments are intended to use a matching threaded connection. Replacement attachments must have the correct thread size, pitch, and orientation.

Technical Specifications

Brand
Clean Storm

Model / Part Number
20261119

Product Type
Rotary Duct Cleaning Kit

Drive Cable Length
10 Meters / 32.8 Feet

Approximate Cable Diameter
14 mm

Drive Method

Clean Storm 20261119 Professional 33 Ft (10 Meter) Drill Powered Air Duct, Dryer Vent & Chimney Cleaning Kit | 8 Brush Heads | Flexible Cable Drive System

Electric Drill

Nylon Brushes
100, 300, 400, 500, 600 mm

Steel Wire Heads
200, 400, 600 mm

Total Cleaning Attachments
8

Drill Included
No

Vacuum Included
No

Important Operating Information

- Inspect the drive cable and attachment connections before every use.
- Confirm each attachment is securely installed before operating the drill.
- Do not reverse the drill unless the attachment connection is approved for reverse rotation.
- Use an appropriate drill speed and torque setting.
- Do not force oversized brushes into undersized ductwork.
- Keep rotating components away from hands, clothing, and loose materials.
- Verify the duct or chimney construction is suitable for the selected attachment.
- Use appropriate dust collection, respiratory protection, and other safety equipment.
- Do not operate over 320 RPM or with the cable coiled up, do not operate in reverse.
