Clean Storm 20261114 Rotary Pro 12" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor 120V 5 Amp

Model Number: 20261114

Clean Storm 20261114 Rotary Pro 12" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor 120V 5 Amp

Manufacturer: Clean Storm

Clean Storm 20261114 Rotary Pro 12" Telescopic Power Carpet Cleaning Wand Professional 10-Speed Rotary Carpet Extraction Wand - 120 Volt, 5 Amp
Ships after 1/24/27
The Clean Storm Rotary Pro 12" is a professional motor-driven rotary carpet cleaning wand that combines mechanical carpet agitation, fan-pattern solution application, and vacuum extraction into one compact cleaning tool.
Unlike traditional carpet cleaning wands that depend on repetitive forward and backward manual scrubbing, the Rotary Pro uses a powered rotating cleaning head to scrub, rinse, and extract suspended soil from carpet fibers during the cleaning process.
The compact 12-inch cleaning head offers improved maneuverability compared to larger 15-inch rotary extraction wands, making it an excellent choice for residential carpet cleaning, furnished rooms, apartments, hallways, and other confined cleaning areas.
With its adjustable telescopic handle, 10-speed rotary control, and low 5-amp electrical consumption, the Rotary Pro 12" is designed to help professional carpet cleaners improve cleaning performance while reducing repetitive manual labor and operator fatigue.
Features and Benefits

- 12-Inch Cleaning Path: Compact rotary cleaning head improves maneuverability around furniture and in confined cleaning areas.
- 10-Speed Adjustable Rotary Control: Adjust the speed of the cleaning head to accommodate different carpet constructions and soil conditions.
- Low 5-Amp Electrical Consumption: Operates on standard 120-volt electrical power while reducing the electrical load compared to the larger Rotary Pro 15" model.
- Three Floating Carpet Agitation Brushes: Mechanical brush agitation helps loosen embedded dirt and lift flattened carpet fibers while floating on springs.
- Three Fan-Pattern Solution Spray Assemblies: Slotted spray openings allow cleaning solution to fan outward across the carpet during rotary operation.
- Three Perforated Vacuum Recovery Shoes: Multiple vacuum recovery openings collect cleaning solution and suspended soil during the extraction process.
- Telescopic Adjustable Handle: More ergonomic accommodates different operator heights and allows for more compact storage and transportation.
- Clear-View Recovery Tube: Allows the operator to visually monitor recovered water during extraction.
- Integrated Transport Wheels: Simplifies movement between cleaning locations.

Clean Storm 20261114 Rotary Pro 12" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor 120V 5 Amp

• Reduced Operator Fatigue: Motor-driven agitation reduces the need for repetitive manual scrubbing.
• Improved Carpet Pile Grooming: Rotary brush agitation helps lift and groom flattened carpet fibers.
• Professional Extractor Compatibility: Designed for use with compatible truckmount and high-performance portable carpet extraction equipment.
• Accepts standard connectors: Carpet cleaning 1.5" ID vacuum hose and carpet cleaning couplers

Three Cleaning Actions in One Tool

Mechanical Agitation
Solution Application
Vacuum Extraction

3 Agitation Brushes
Help loosen embedded soil and lift carpet fibers.
3 Fan Spray Assemblies
Distribute cleaning solution through slotted spray openings.
3 Vacuum Recovery Shoes
Recover dirty water through multiple vacuum openings.

All three cleaning functions operate together as the rotary head spins across the carpet, allowing the technician to scrub, rinse, and extract during the same cleaning operation.

Recommended Surface
Compatible Carpeted Surfaces Only

Why Choose the Rotary Pro 12"?
Bigger is not always better when cleaning residential carpets. Although wider rotary extraction tools offer advantages in large open commercial areas, smaller cleaning heads are easier to maneuver in furnished homes and confined spaces.

- Easier maneuverability around furniture.
- More practical for smaller bedrooms and hallways.
- Smaller rotary apron and spinning cleaning assembly.
- Lower electrical consumption than the 15-inch model.
- Well suited for residential carpet cleaning contractors.
- Less repetitive manual scrubbing than conventional wands.
- Adjustable handle height for improved operator ergonomics.
- Works with both portables and truck mounts.

Electrical Advantage: The Rotary Pro 12" draws approximately 16.7% less electrical current than the Rotary Pro 15".
Recommended Applications

- Professional residential carpet cleaning
- Apartment and rental property carpet cleaning
- Hotel and motel guest rooms
- Bedrooms and furnished living rooms
- Office carpet cleaning
- Hallways and confined carpeted areas
- Heavily soiled carpet traffic lanes
- Carpet pile grooming
- Carpet water extraction and flood restoration
- Routine commercial carpet maintenance

Operating Tips
1. Vacuum the Carpet Before Cleaning
Remove as much dry soil, hair, and loose debris as possible using a professional commercial vacuum cleaner before beginning wet extraction.
2. Apply Carpet Cleaning Prespray
Apply an appropriate carpet cleaning prespray and allow the recommended chemical dwell time before rotary extraction.
3. Adjust the Rotary Cleaning Speed
Start with a lower speed setting and increase the rotary speed as needed based on

Clean Storm 20261114 Rotary Pro 12" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor 120V 5 Amp

carpet construction and soil conditions. Always test an inconspicuous area before cleaning the entire carpet.
4. Scrub, Rinse, and Extract Simultaneously
Move the rotary wand smoothly across the carpet, allowing the three agitation brushes, three solution spray assemblies, and three vacuum recovery shoes to perform the cleaning process.
5. Perform Additional Dry Passes When Necessary
Release the solution trigger and perform additional vacuum recovery passes as needed to improve water recovery and reduce carpet drying times.
6. Clean and Inspect After Each Job
Remove accumulated carpet fibers, hair, and debris from the rotary head. Inspect the spray slots and vacuum recovery holes for restrictions and clean them as necessary.
Frequently Asked Questions
Q. Does this machine require a separate carpet extractor?
A. Yes. The Clean Storm Rotary Pro 12" is a powered carpet extraction wand, not a standalone carpet cleaning machine. A compatible external carpet extractor is required to supply cleaning solution and provide vacuum recovery.

Q. Can I use this wand with a truckmount carpet cleaning machine?
A. Yes, provided the truckmount supplies compatible solution pressure, water temperature, flow, and vacuum performance. This includes compatible gasoline, diesel, electric, PTO, clutch-drive, and slide-in truckmount carpet cleaning systems.

Q. Can I use this machine with a portable carpet extractor?
A. Yes, provided the portable extractor produces adequate vacuum airflow and compatible cleaning solution pressure and flow.
High-performance portable carpet extractors equipped with multiple vacuum motors are generally preferred for rotary extraction. Actual water recovery depends on the vacuum motor configuration, hose diameter, hose length, and overall extractor performance.
The smaller 12-inch cleaning head may be a more practical option than the larger 15-inch model for most portable extractor operators.

Q. Should I reduce my vacuum hose length when using a rotary power wand?
A. Rotary carpet extraction tools require adequate vacuum airflow for effective water recovery. Using the shortest practical vacuum hose length helps reduce airflow restrictions and improve carpet drying performance.
If water recovery is insufficient, reduce the vacuum hose length and inspect the extractor, filters, hoses, and recovery openings for restrictions.

Q. Can this wand be used for flood water extraction?
A. Yes, on compatible carpeted surfaces only. The Rotary Pro 12" can assist with water recovery from wet carpet when connected to an appropriate water extraction system.

Clean Storm 20261114 Rotary Pro 12" Telescopic Power Carpet Cleaning Wand 10-Speed Rotary Extractor 120V 5 Amp

Do not operate the rotary cleaning head on hard surfaces.

Q. Can I use this wand to clean tile or hard flooring?
A. No. This rotary cleaning assembly is designed for carpeted surfaces. Operating it on concrete, tile, hardwood, vinyl, or other hard flooring could damage the cleaning head, brushes, vacuum shoes, or flooring.

Q. What is the advantage of the three fan-pattern spray assemblies?
A. The slotted spray design allows cleaning solution to fan outward as it is applied to the carpet. The rotating brushes provide mechanical agitation while the three vacuum recovery shoes collect suspended soil and dirty water.

Q. Does the telescopic handle improve operator comfort?
A. Yes. The adjustable handle allows technicians of different heights to select a more comfortable operating position, helping reduce unnecessary bending and repetitive manual scrubbing.

Q. Should I purchase the 12-inch or 15-inch Rotary Pro?
A. The 12-inch model is recommended for technicians who primarily clean residential properties, apartments, furnished rooms, and confined areas.
The larger 15-inch model is preferred when maximizing cleaning width in large commercial spaces and open carpeted areas is the primary concern.
Important Safety and Storage Information

- For compatible carpeted surfaces only.
- Do not operate the rotary head on hard flooring.
- Use a properly grounded electrical outlet with appropriate electrical protection.
- Keep electrical connections away from standing water.
- Never operate the rotary head over electrical cords.
- Disconnect electrical power before servicing or cleaning the rotary assembly.
- Always follow the carpet manufacturer's cleaning recommendations.
- Test delicate carpet fibers before using powered rotary agitation.
- Do not allow the machine or solution system to freeze.
- Do not store the machine with its weight resting on the rotary brush fibers.

Remove the cleaning head or lay the wand on its back during storage.

Clean Storm Rotary Pro 12" - 20261114
Scrub, Rinse, and Extract in One Operation!
Enjoy the advantages of powered rotary carpet cleaning in a compact 12-inch design with adjustable speed control, a telescopic handle, three agitation brushes, three fan-pattern spray assemblies, and three vacuum recovery shoes.
