Introducing the Escape® Plus, the first electric truckmount to truly rival gas power!
Featuring Triple LX® vacuums, the Escape® Plus's specs are up to 350+ CFM and 17 in. Hg / " and at a fraction of the cost of gas-powered truckmounts!

57,597 vacuum units

44 amp Vacuum

You can now enjoy the advantages of electric—such as reduced costs, minimal maintenance, and low environmental impact—without sacrificing raw power.

The Escape® Plus also comes standard with chemical metering, a 1000 PSI solution pump and a 3.3 GPM pump-out to make for one seriously incredible machine!

Features:

Three exclusive Mytee® LX® Vacuum Motors — outputting 242+ CFM and 17.5 in. Hg (238 Inches X 242 CFM = 57,594 vacuum units)

Autofill and automatic pump-out

12 gallon solution and recovery tanks, plus an included transfer pump to expand capacity to additional holding tanks

The industry's only truckmount to come standard with a transfer pump

3.5 GPM pump-out

1000 PSI adjustable solution pump

Chemical metering

Weighs only 180 lbs!

Amp Draw

30 amp @ 240 volts

Generator Requirements

457cc or larger with premium or ethanol free fuel

Sold machine only for this webpage Plus includes the extended warranty.

Questions and Answers:

>

Q. Will this machine operate on a standard electric clothes dryer outlet?

A. NO, uses way too much electricity.

Q. What will happen if I used on a standard 389cc or 420cc generator?

A. I expect the generator will operate but something is going to give. This would be like me selling you a car with a top end speed of 120 miles and hour and you try to drive it 140 miles an hour every time you get behind the wheel. Every single generator manufacture recommends that your actual use rating be at least 20% higher that the normal run capacity of the generator. This machine uses 70 amp or 8400 watts of power. That means the run capacity really should be 10,000 watt. This would place the surge or starting capacity at about 12000 watts. That is a 459cc generator or larger using premium fuel or ethanol free fuel. E85 and E87 would not be recommended! Please note the generator would also have to be grounded or bonded to the building. We have discussion in our forums on how to bond the generator to the building.

Q. Do all 4 power cords have to be turned on to use this machine?

A. No, this machine will operate on 2, 3 or 4 power cords each on it own 20 amp breaker.

Optional

BE Pressure BE12000ES 459cc 9500 Watt 12000 Surge Gasoline Generator
Electric Start

. NOTE: in 2021 Mytee change the design from being a 4 power corded NEMA 5-15 design, the newer machine operates on a single NEMA 14-30P
Usually you will need to purchase this power adapter below.
