200 psi internal bypass diaphragm pumps are here! These pumps are switched at 220 psi and bypass at 170-175 psi through a #2 orifice.

Aquatec is the only USA Made pump on the market as flojet and shurflo have gone to Mexico/China. Our pumps have the following key differentiating features:

- Made in USA
- The only sealed motor on the market, to prevent moisture and dust intrusion
- All of our models incorporate the combination demand switch and internal bypass, to ensure there is no cycling with #2 tips or larger
- Our high efficiency motors are made in here in California with the longest life brushes and front/rear bearings for reliable performance.
- Have all agency approvals, UR, CE, and RoHS.

Optional: Pumps designed for intermittent use and can overheat in temperatures exceeding 175 degrees F. Purchase the Heat Seal to reduce overheating for extended use.
