51 LED Ultraviolet Light with Metal Body
Item No. AX173

51 LED Ultraviolet Light with Metal Body
Powerful UV Light for Urine Detection

The best investment you'll ever make! Carpet cleaners know that real gold is yellow – and found in carpets, not caves. This high-powered, 51 LED UV light is built specifically for urine detection and will have you screaming "Eureka" all throughout your customer's house. The lights are tuned to work in the 390-395nm range of the UV spectrum and waste very little energy in the spectrum of light that doesn't cause the molecules in urine to fluoresce. Translation: more battery power is devoted to detecting urine stains, not lighting the room.

Durable is an understatement for this light. The UV light is water resistant, shockproof and the rugged aluminum body will protect your light from mishaps in the van. LED lifetime is an impressive 100,000 hours and will run for hours on three AA batteries.

Don't get stuck with a dead light! Rechargeable lights can provide unpleasant surprises when you show up to a customer's house and discover your battery is dead. Keep a spare set of batteries handy and you'll never be without your gold detector.

Used to detect urine, hidden body fluids and scorpions!
If more power is required at 385nm, this flashlight features fifty-one LEDs for more power output!

- Aluminum body with o-rings

# HydroForce AX173 UV 49-51 LED Flashlight Urine detection Torch 1648-0170

- Includes rubber anti-roll head (not pictured)
- Includes push-on rubber anti-roll head
- 3 x AA Alkaline cells required
- Click on/click off switch on side near head
- Weight: 7oz
- Dimentions: 2.0" head diameter x 5.75" length
- Device emits UV radiation. Do not look directly at beam. Keep out of reach of children.
- 90 day warranty

Product Information

This Black Light / UV LED flashlight is designed using powerful long wave UV at 380-385 nanometers (nm). Don't settle for cheap LED's that give lots of blue and purple light but not able to detect any of items below. With the 380-385 nm, you can see all the items below plus more.

- Urine Stain Detection
- Glass
- Bugs/Insect Detection such as scorpions and millipedes Minerals and Gems. Fluorite, calcite, gypsum, ruby, talc, opal, agate, quartz, and amber have fluorescent properties. Minerals and gemstones are most commonly made fluorescent due to the presence of impurities.
- US $5, $10, 20, $50, and $100 dollar Bill all have water marks under UV light.
- ID on Driver

- Automobile Air Condition Fluid Leaking (Freon)
- Forensic Investigation
- Pest inspections
- Antique Identification
- and Many more.

Specifications:

# HydroForce AX173 UV 49-51 LED Flashlight Urine detection Torch 1648-0170

Bulb Type
Longwave UV LED, 380-385 nm

Bulb Life
100,000 Hours

Body Material
Aluminum with “O” rings for water resistance

Battery Require
3 x AA Alkaline Battery (Not Included)

Battery Life
Approximately 60 hours+ on 3 AA batteries

Switch Type
Press on, Press off side rubber cap

Weight
7 oz.

Head Diameter
2” Inches

Body Diameter
1 1/4”

Length
5 3/4” Inches
