Vaportek Restorator Vapor Membrane Room and Project Deodorizer 115 volt

Model Number: AR38

Vaportek Restorator Vapor Membrane Room and Project Deodorizer 115 volt

Manufacturer: HydroForce

The Restorator is an ideal unit for odor treatment in vehicles and areas up to 20,000 cu. ft. Just load the compact machine with an industrial odor neutralizing cartridge and turn it on. Cartridges are rated for up to 200 hours of service. After initial restoration, scented secondary cartridges may be used to diffuse a pleasant scent into the area. Scents available are Berry, Lemon, Orchard and Forest.
Vaportek odor control systems provide immediate odor neutralization in situations where other methods may fail. These systems incorporate natural, non-toxic essential oils and odor neutralizing compounds in patented membrane cartridges that breathe a penetrating dry vapor into the air. Unlike fogging and ozone treatments, Vaportek products can be used in occupied structures. They will not harm people, plants or animals, or affect fabrics, rubber, adhesives and other materials and surfaces. The systems have been proven effective in fire and flood restoration, industrial and healthcare facilities-even in eliminating difficult-to-remove urine odors.
