Nikro 861601 25' Blue Skipper Dryer Vent Cleaning Line with Reverse Spinning Nozzle

Model Number: 861601

Nikro 861601 25' Blue Skipper Dryer Vent Cleaning Line with Reverse Spinning Nozzle

Manufacturer: Nikro

Nikro 861601 25' Blue Skipper Dryer Vent Cleaning Line
The Nikro 861601 Blue Skipper is a professional 25-foot compressed-air dryer vent cleaning line equipped with a reverse-spinning nozzle. The spinning head helps propel the line through ductwork while navigating bends and elbows, making it especially useful for cleaning long or difficult dryer vent runs.
The Blue Skipper is an excellent tool for professional dryer vent cleaners, HVAC contractors, chimney service companies, restoration contractors, and other technicians who need to remove lint and debris from dryer exhaust ductwork using compressed air.
Why Use a Reverse-Spinning Skipper?

The reverse-spinning nozzle uses compressed air to help propel the skipper line through the vent while disturbing and moving accumulated lint and debris. Its flexible 25-foot line can travel through multiple elbows that may be difficult to reach with rigid cleaning tools.
This design is especially useful when cleaning a dryer vent from the exterior termination back toward the dryer.
Features

- 25-foot Blue Skipper line
- Reverse-spinning cleaning nozzle
- Designed for professional dryer vent cleaning
- Helps navigate bends and multiple elbows
- Compressed-air powered
- Flexible line reaches areas inaccessible to rigid tools
- Useful for residential and commercial dryer exhaust ductwork
- Genuine Nikro Industries product

Specifications

Manufacturer
Nikro Industries

Part Number
861601

Product

Nikro 861601 25' Blue Skipper Dryer Vent Cleaning Line with Reverse Spinning Nozzle

Blue Skipper Line with Reverse-Spinning Nozzle

Line Length
25 ft.

Primary Application
Dryer vent and duct cleaning

Power Source
Compressed air

Recommended Pressure Range
150–200 PSI

Minimum Airflow
10 CFM+

Gas Compressor
10-gallon tank or larger recommended

Electric Compressor
15-gallon tank or larger recommended

Important — Additional Connection Equipment Required
The Nikro 861601 does not operate by itself. Nikro specifies that item #860497 or #861600 is required to operate this skipper line. Make sure you have the proper compressed-air connection equipment before ordering.
The intake fitting coupler used with this system is Nikro 860506 .
Ideal for Dryer Vent Cleaning
Dryer exhaust systems frequently contain bends, elbows, and long duct runs where lint can accumulate. The flexible Blue Skipper line and reverse-spinning nozzle allow compressed air to reach farther into these areas than many conventional hand tools. For best results, dryer vent cleaning should normally be performed while using appropriate lint collection or vacuum equipment so loosened debris is controlled rather than released into the surrounding area.
What Is Included?

Steambrite Supply

Nikro 861601 25' Blue Skipper Dryer Vent Cleaning Line with Reverse Spinning Nozzle

- One Nikro 861601 25-foot Blue Skipper line
- Reverse-spinning nozzle

Air compressor, hoses, couplers, control valves, and other connection equipment are sold separately unless specifically stated otherwise.
Verify your existing Nikro compressed-air system and connections before ordering.
Product specifications and appearance are subject to manufacturer change without notice.

âš IMPORTANT — ADDITIONAL EQUIPMENT REQUIRED
The Nikro 861601 Blue Skipper Line cannot be operated by itself.
Requires Nikro #860497 OR #861600 to operate.
Please verify that you have the required Nikro compressed-air control/connection equipment before ordering.
