Model Number: document paper drying

San Antonio Document Drying Wet Paper Restoration Water Removal

Manufacturer: Steambrite MFG

Document Drying Wet Paper Restoration Water Removal San Antonio TX

Do not lose you critical, precious, heirloom, or legal documents with our drying service for books, blueprints, legal documents, paperwork, schematics, artwork...

Stops further damage caused by decay, mold, and mildew with our document restoration and drying service.

We offer an environment at our location to dry all your important papers or we can set up a drying chamber at your location. We even offer do-it-yourself rentals and training.

No matter the cause we can help get you back to normalcy quickly. Usually this damage is caused by fire sprinkler damage.

On Site VS Our Location?

Bacteria, mold, mildew, and fungus all like the same environment that is comfortable for humans. Damage is accelerated in dark, wet, environments with a food source. In this case the food source is cellulosic material (the paper.) If you try to dry papers with the normal 72 degree F @ 50% relative humidity is just not going to work. In most cases we keep our room is placed at 115 degrees F and at 5-10% relative humidity. We add a little air movement. Paper is pretty hygroscopic and being such will release the water when it is placed in a dry enough environment. 115 degree F is too hot for bacteria to grow. Depending on the items we can optionally apply a disinfectant, fungicide, virucide, sanitizer, mildewstat and deodorizer all in one to the papers using an ULV Fogger, sanitizer, and air mover during the drying cycle.

You can read more about these below:

ULV Fogger

Tool

Once the paper are dry enough, they are fanned through the ultra fine mist of sanitizer generated by the ULV fogger that is blowing with the air mover wind tunnel.

What does this cost?

Our Location:. \$107 a cubic foot of paper or documents  
\$200 min charge.

We can provide pick up, packaging, inventorying, and delivery or on site drying if needed.

If you do not want the papers removed we can build a temporary room with this same drying service. I will add to added labor, materials, as well as service calls.

Shazaam  
HEPA 500 Rental SATX

>

>

San Antonio TX DefendAir Hepa 500 Air Scrubber (Machine Equipment Rental)

What to expect:

It takes about 24 hours for the carpet to feel dry

It takes about 48 hours for the carpet cushion under the carpet to dry

It takes about 72 hours for the sheet rock or gypsum board to dry

Hardwood, behind cabinets, and certain other construction materials require extended dry times.

Do not turn off any drying equipment until project is complete!

Additional inspection testing work is required before removal of drying equipment to ensure all areas are dry. Testing can be performed with moisture meters

Once the building materials are dry, Carpet cleaning and sanitizing service is recommended.
