Are you going to purchase this for your Mytee 1003DX, Sandia 80-3500H, Clean Storm 12-3500-HAFAD or Clean Storm12-3500-H or some other high amp draw portable?

Please note that it is the users responsibility to test the outbound current before use. Just because it fits does not mean that it is OK to use. Please consider purchasing a Multimeter to test outbound voltage at each new job site. This only takes 30 seconds and might save you from having to replace your plugged in extractor or dehumidifier. It is the users responsibility to make sure that you do not overload the amp draw. Please know your equipment! For example if I am plugging in lots of dehumidifiers into this unit, standard electrical code states for long term use, do not exceed 80% capacity. This means that the max amp draw from this box if I am running my appliance that more than just a few hours should be 16 amps per receptical.

Esta mochila eléctrica del principio del convertidor es perfecta para el profesional de la restauración y limpiador de alfombra de profesional. Este surtido se compone de cuatro pedazos. La unidad principal tapa en su salida eléctrica uniforme del secador en la habitación de la utilidad de la mayor de los hogares. Este 3 pinchan 30 amp 220 cabeza del voltio queda también tapones comerciales de máquina de café; y salidas de calentadora de agua de la mayor de los edificios construyeron antes 1997. Esta caja del convertidor toma el 220 poder del voltio y le da dos separados 25 cachones de amp con dos 20 amp 120 protección de la Interrupción del Defecto del Suelo del voltio. Este convertidor operará; 4 dehumidifiers grande o a 4 autores aéreos al mismo tiempo. Para el equipo portátil de limpiar de alfombra que necesita dos cachones de circuito, esto es su respuesta fácil de no tener para preocuparse por cachones veloces ni fusibles que soplan. Este convertidor tiene una reputación probada para sobre 20 años. Este 4 juego de la mochila viene también con las cabezas de adaptador a permitir que usted tapar en estufas, en los hornos, en hogares de móvil, y en muchas otras ubicaciones.

Note: User assumes all responsibility on use. It is the users responsibility to check the inbound voltage, outbound voltage, and total amp draw to verify these are not
