Model Number: PP15-808068

Prochem PP15-808068, Pressure Regulator Unloader, 1500-2300 psi 8.619-166.0

Manufacturer: Prochem

Prochem Pressure Regulator Unloader 1200-2300 psi 8.619-166.0

Regulating unloader with a flow range of 2.5 - 8.0gpm and a pressure range of 150 - 1200-2300psi.

**Discontinued by Prochem but still available for sale, read notes below!
Outlet check valve ball bearing must be removed before using with Prochem machines to convert this from unloader to a pressure regulator.
New unloader will arrive with a 2300 psi spring so you will need to remove this 2300 psi spring and replace with the original 1500 psi spring from your old unloader.
With the check valve installed, this is not recommended for weep system. This is why you have to remove the check valve on Prochem, Century 400, and White Magic Truckmounts.
