Malish 786716, Mighty-Lok 16in Polymeric Face Pad Driver With Molded Riser, GTIN 6-15129-86716-0

Manufacturer: Malish

Malish 786716, Mighty-Lok 16in Polymeric Face Pad Driver With Molded Riser, GTIN 6-15129-86716-0

Description

Mighty-Lok® is our best-selling polymeric pad driver, engineered with a molded polymer pad face featuring hundreds of individual hooks that grip into the Flex Scrub® or the threads of a floor pad and hold it securely while the machine is operating. It is designed to securely retain traditional floor pads as well as bristled floor pads, such as Flex Scrub®.

This secure pad engagement helps maintain consistent pad contact during floor maintenance tasks.

The block includes a built-in riser and an integrated showerfeed system, allowing it to be used with solution-dispensing machines. Mighty-Lok® requires a clutch plate or mounting system designed for a 5-inch center hole configuration.

Features

- Molded polymer hook face for secure pad engagement
- Built-in riser for proper clearance
- Integrated showerfeed system for solution dispensing machines
- Requires 5″ center hole clutch plate or compatible mounting system

\$70.29
