Questions and Answers:

Question: What is the recommended minimum vacuum to operate a 14" wide wand?
Answer: Operating wider wands is like operating power wands. Expect to put down more water and need more vacuum to pick it back up. Please read the article posted at What is the recommended hose length to use with my extractor. Please place this 14"+ wands in the power wand category.
"What is the recommended hose length to use with my portable carpet cleaning machine."
