Filters are Built to order!
Please allow 30+ days for build.
Orders are NON-CANCELABLE and non refundable.
Description
HEPA filters are standardized using 5/8" particle board framing. Each frame is glued and stapled to provide a rigid enclosure for media pack.
Construction
Media: Each filter is constructed from one continuous sheet of high strenthg waterproof glass microfiber paper, sealed to the frame on all four edges.

Separators: Media separators are corrugated aluminum. A separator is placed between each pleat of media to prevent the pleats from touching. This allows the air to pass through with minimum of resistance.

Adhesive Sealants: Standard sealants utilized are fire retardant rubber bade adhesive and urethane sealant. These sealants are applied as a fluid and solidifies to provide a positive seal between the media pack and frame.

Gaskets: All standard HEPA filters are equipped with a closed cell neoprene gasket. Placement is on the Downstream side of the filter unless otherwise specified. If a gasket is required on both sides of the filter it must be indicated in the purchase order.
Features

- 95% & 99.97% Efficiencies available
- 99.97% @ 0.3 Micron DOP tested HEPA Filter
- Corrugated aluminum media separators
- Standard (18 pleats/ft.) or High-Capacity (36 pleats/ft.)
- Sealed internally with Urethane Sealant 5 7/8″ & 11 1/2″ Depths available in all sizes.

Specification
Hepa filter 24" X 24" x 12" 99.97%
Actual size is 23-3/8" X 23-3/8" X 11-1/2"
Air flow can be filtered in any direction.
