Clean Storm 20140125 Pressure Washer Hi-Flo 20 Micron Waste water Filtration Kit for Vacuum Water Evacuation Reclaim Units

Model Number: 20140125

Clean Storm 20140125 Pressure Washer Hi-Flo 20 Micron Waste water Filtration Kit for Vacuum Water Evacuation Reclaim Units

Manufacturer: Clean Storm

Clean Storm 20 Micron Wastewater Filtration Kit for Vacuum Water Evacuation Units

First filter is 50 micron and second filter is 20 microns

Looking for truckbed or flatbed trailer filtration?
Recover wastewater and filter it to 20 micron
before transferring to your storage tank where the
recovered wastewater is reusable for flatwork
cleaning. Filters up to 5gpm, 115v, 15amp or
3500w generator. Optional 5 micron tank filter kit

Please note this is not everything you will need to filter water. You must have a vacuum system with lint filtration. You must have two pumps. One to pump water from the filtration vacuum unit that travels into the filter, and one leaving the filter that pushes the water down the garden hose or back into your fresh tank. The dirty water must be both pushed and pulled through the filters. These transfer pumps and be 12 volts, 120 volts, or 230 volts depending your country and if you want to run on a generator, wall outlet and batter bank.

You must wash the filters after each job and even consider changing out the water in the fresh tank daily. The pumps should be mounted so they are protected from freezing and kept out of the sun for long life, yet need to be able to breath to keep the motors cool.

Please note color of plastic and shape of bracket is subject to change without notice
Includes the items in the list below:

Brass Nipple 3/4" Male X 3/4" Male Pipe thread with Hex Brass

One unit in this kit
