Model Number: 85.403.007

Clean Storm 85.403.007, 20in Plastic Spinning Surface Cleaner Rotary Cement Wand, 3/8in QC Inlet, Viper V-20SC

Manufacturer: Clean Storm

Clean Storm 85.403.007, 20in Plastic Spinning Surface Cleaner Rotary Cement Wand, 3/8in QC Inlet
Description
The Clean Storm 85.403.007 20" Polypropylene Surface Cleaner delivers heavy-duty pressure washing efficiency up to 4000 PSI and 8.0 GPM for concrete and flat surface cleaning. Built with a durable high-impact polypropylene cover, a two-arm rotary spray bar equipped with two #2.5 @ 25° meg nozzles, and an integrated trigger gun with a 3/8" Quick Connect plug, this cement wand dramatically speeds up surface cleaning while eliminating zebra striping. Designed for optimal performance with gas engines rated 9 HP and pumps delivering 3.0 GPM or greater, it maintains constant operating temperatures up to 212°F while containing overspray via its full nylon brush skirt.
Features

- High-Impact 20-Inch Polypropylene Housing: Lightweight, corrosion-resistant plastic deck reduces operator fatigue while maintaining long-term structural durability.
- Balanced 2-Arm Rotary Spray Bar: Engineered with two calibrated #2.5 25-degree meg spray nozzles for uniform chemical and high-pressure water distribution without streak lines.
- Full Nylon Brush Skirt: Encapsulates high-pressure water spray, minimizing overspray and protecting adjacent landscaping, walls, and vehicles during operation.
- Integrated Heavy-Duty Trigger Gun: Features an ergonomically designed spray gun equipped with a standard 3/8" Quick Connect plug inlet for instant hose attachment.
- High Flow & Temperature Capacity: Rated for operating pressures up to 4,000 PSI, flow rates up to 8.0 GPM, and fluid temperatures reaching 212°F.
- Efficiency Optimization: Cleans flat surfaces up to 3 to 4 times faster than standard handheld spray wands.

Clean Storm 85.403.007, 20in Plastic Spinning Surface Cleaner Rotary Cement Wand, 3/8in QC Inlet, Viper V-20SC

• Residential & Commercial Concrete Cleaning: Driveways, sidewalks, garage floors, patios, and parking structures.
• Commercial Property Maintenance: Service stations, drive-thrus, entryways, and pool decks.
• Pressure Washer Equipment Compatibility: Functions seamlessly with commercial gas-driven pressure washers, truckmount units, and industrial pressure pumps rated at 3.0 GPM or higher.
• Industrial Surface Prep: Rapid removal of dirt, algae, moss, grime, and surface contaminants from flat stone, concrete, and masonry surfaces.

Specifications

Brand
Clean Storm / BE Pressure / Pressure-Pro

Model / Part Number
85.403.007 / V-20SC

Deck Diameter
20 Inches

Primary Material / Finish
High-Impact Polypropylene / Yellow or Gray Finish

Maximum Operating Pressure
4,000 PSI (275 BAR)

Pressure Operating Range
1,000 PSI to 4,000 PSI

Maximum Water Flow Rate
8.0 GPM (30.4 LPM)

Minimum Recommended Flow Rate
3.0 GPM (Requires ~9 HP Engine)

Steambrite Supply

Clean Storm 85.403.007, 20in Plastic Spinning Surface Cleaner Rotary Cement Wand, 3/8in QC Inlet, Viper V-20SC

Maximum Fluid Temperature
212°F (100°C)

Temperature Operating Range
30°F to 212°F

Inlet Connection Type
3/8" Quick Connect Plug (Inlet on Trigger Gun)

Trigger Valve Assembly
BE Pressure 16" Whirl-A-Way Trigger Valve AC7501

Rotary Arm Configuration
2-Arm Spray Bar

Nozzle Specifications
(2) #2.5 Nozzles @ 25° Spray Angle (Meg Nozzles)

Skirt Construction
Heavy-Duty Nylon Bristle Brush Skirt

Product Weight
28.0 lbs (Operating Weight)

Shipping Weight
39.66 lbs

Shipping Dimensions
33" L x 23" W x 12" H

UPC / EAN

Tips and Additional Information
To maximize the operational lifespan and cleaning effectiveness of your Clean Storm

Steambrite Supply

Clean Storm 85.403.007, 20in Plastic Spinning Surface Cleaner Rotary Cement Wand, 3/8in QC Inlet, Viper V-20SC

20" surface cleaner, ensure your pressure washer pump provides a minimum flow rate of 3.0 GPM. Prior to initial connection, flush high-pressure supply hoses to clear debris that could clog the fine orifices of the two #2.5 spray nozzles. Always inspect nozzle orifices for buildup or blockages; clogged nozzles cause severe vibration and irregular rotation. Ensure thread tape or sealant is properly applied if replacing spray tips or trigger gun fittings. Note: Units may ship in either yellow or gray high-impact plastic housing with or without top dome brand stickers depending on manufacturing batch run, but feature identical structural and mechanical performance specifications. Factory Installed

BE Pressure 89218340, 16 Whirl A Way Triggler Valve, GTIN NA

Frequently Asked Questions
Q: What size pressure washer is required to run this 20-inch surface cleaner?
A: It is recommended to use a gas-powered pressure washer with an engine rating of at least 9 HP and a pump output of at least 3.0 GPM up to 8.0 GPM, with an operating pressure between 1,000 PSI and 4,000 PSI.
Q: What inlet connection is provided on the surface cleaner?
A: The integrated trigger gun assembly comes equipped with a standard 3/8" Quick Connect male plug inlet for fast pairing with standard pressure washer discharge hoses.
Q: Can I use this surface cleaner with hot water pressure washers?
A: Yes, the unit is rated to withstand hot water temperatures up to 212°F (100°C).
Q: What nozzle size comes pre-installed on the rotary spray bar?
A: The rotary bar includes two standard #2.5 meg nozzles with a 25-degree fan spray pattern, equivalent to a combined orifice size of 5.0.
Warranty & Safety Information
This product carries a manufacturer limited warranty covering defects in materials and workmanship under standard operating conditions. Warranty coverage does not extend to normal wear items including spray nozzles, nylon brush skirts, O-rings, and swivel seal wear caused by abrasive water debris. Operating the surface cleaner

Steambrite Supply

Equipment: Hard Surface Cleaning Supplies > Pressure Washer Accessories > Surface Cleaners-Brooms-Spinner Wands-Twister Vacs-Under Carriag > Clean Storm 85.403.007, 20in Plastic Spinning Surface Cleaner Rotary Cement Wand, 3/8in QC Inlet, Viper V-20SC

beyond the maximum specified ratings of 4,000 PSI, 8.0 GPM, or 212°F will immediately void the warranty. Always wear protective eye and foot protection during operation. Never attempt to inspect, clean, or service the rotary arm or nozzles while connected to a pressurized water system or while the pressure washer motor is running.
