Shop Vacuum High Efficiency Yellow Collection Filter Bag Each 38in X 15in Each - 9067300 - 906-72-00 [906-73-00]

Manufacturer: Clean Storm

Shop Vacuum 906-73-00 High-Efficiency Yellow Collection Filter Bag
Large 38 x 15-inch yellow collection bag for dry pickup of fine dust and debris.
This high-efficiency collection filter bag installs inside many 14- to 20-gallon wet/dry vacuum tanks. It serves as a first-stage collection filter, capturing dry dust before it reaches the vacuum’s primary cartridge or HEPA filter.
Using a disposable collection bag can help maintain airflow, reduce filter loading, simplify tank cleanup, and extend the usable life of more expensive secondary filters.
Important: This bag is designed for dry pickup only. Do not use it for water, wet slurry, hot debris, burning materials, hazardous substances, or any application not approved by the vacuum manufacturer.
Product Features

- High-efficiency disposable dust collection bag
- Designed for dry fine-particle pickup
- Helps reduce dust buildup inside the vacuum tank
- Protects the vacuum’s secondary cartridge or HEPA filter
- May help maintain suction by reducing premature filter loading
- Stiff cardboard inlet support helps stabilize the connection
- Elastic sealing band fits around the vacuum’s internal inlet port
- Large-capacity design for many 14- to 20-gallon wet/dry vacuums

Common Applications

- Air-duct cleaning
- Drywall and sheetrock dust
- Concrete and construction dust
- Woodworking debris
- Restoration cleanup
- General dry commercial vacuuming

Specifications

Product type
Disposable collection filter bag

Color
Yellow

Shop Vacuum High Efficiency Yellow Collection Filter Bag Each 38in X 15in Each - 9067300 - 906-72-00 [906-73-00]

Approximate dimensions
38 inches long x 15 inches high

Approximate flat area
570 square inches per side; approximately 1,140 square inches when both sides are counted

Inlet opening
Approximately 2-1/2 inches

Suggested vacuum size
Many 14- to 20-gallon wet/dry vacuums

Pickup type
Dry material only

Quantity
One bag

Steam-Brite ordering part number
906-73-00

What You Receive
One yellow high-efficiency collection filter bag. This listing is not for a package, case, vacuum, hose, cartridge filter, or HEPA filter.
Compatibility Information
This is a large universal-style collection bag that may fit many 14- to 20-gallon wet/dry vacuum systems equipped with an internal inlet of approximately 2-1/2 inches. Tank capacity alone does not guarantee compatibility.
Before ordering, compare the bag dimensions, inlet opening, attachment method, and available space inside your vacuum. The bag must not interfere with the float shutoff, filter cage, motor assembly, or other internal components.
Order by part number and specifications—not by image alone.
Vacuum designs and inlet configurations vary. Please confirm compatibility with your exact vacuum before ordering.

Cross-reference numbers are provided only as an aid in product identification. A cross-reference does not guarantee compatibility with every vacuum previously associated with that number.
Frequently Asked Questions
Is this a HEPA filter?
No. This is a disposable first-stage collection bag. It may help protect a separate cartridge or HEPA filter, but the bag itself should not be represented as a certified HEPA filter.
Can this bag pick up water or wet slurry?
No. Remove the bag before performing wet pickup. Moisture can damage the bag, restrict airflow, and allow collected material to enter the vacuum tank.
Will it fit every 14- or 20-gallon shop vacuum?
No. Vacuum tank size is only a general guide. Inlet location, inlet diameter, filter-cage clearance, and internal tank design must also be checked.
How many bags are included?
This listing includes one collection bag.
Why use a collection bag?
A collection bag captures dry debris before it reaches the vacuum’s main filter. This can make disposal cleaner, reduce filter maintenance, and help preserve airflow during fine-dust pickup.
Specifications, packaging, color, and appearance are subject to change without notice. Product images are for general reference. All purchases are fulfilled according to the part number and written specifications shown on the order.
Shop Vac High Efficiency Yellow Collection Filter Bag

Can be used on the inside of most 14 gallon to 20 gallon wet and dry vacuum systems for dry pick up only of fine particles and dust.

Used in air duct cleaning, sheet rock dust, mold, more as a first stage filtration system.
Improves airflow characteristics, reducing the loss of suction power.
Increases cleaning productivity by reducing time spent cleaning or changing filters.
Protects more expensive HEPA filters from having to be replaced as often.

Rubber band makes a good seal around in-bound port opening with stiff cardboard support.

38"L X 15"H / 1140 sq inches.
Accepts a 2.5" opening in cardboard.

Replacement Information
Current Replacement Part: 906-73-00

This high-efficiency collection filter bag replaces the earlier 906-72-00 version. If your vacuum or owner's manual lists 906-72-00, you should order 906-73-00 as the current replacement.

- Current Part Number: 906-73-00
- Replaces: 906-72-00
- Compatible with many 14- to 20-gallon shop vacuum systems used for dry pickup

Availability: This product was added to our catalog on Friday 30 August, 2013
