Model Number: 20131411

Clean Storm 20131411 Cold Electric Pressure Washer 6720 Cleaning Units 2100 psi 3.2 gpm 2 Power Cords 115 Volts

Manufacturer: Clean Storm

Clean Storm 20131411 " 6720 Cleaning Units Cold Electric Pressure Washer

The Fastest-Cleaning Pressure Washer We Know of That Runs From Regular 120 Volt Wall Outlets

No other electric pressure washer that can operate from standard 120 volt wall outlets cleans with this speed and performance. The Clean Storm 20131411 delivers an impressive 2100 PSI at 3.2 GPM, producing 6720 cleaning units.

Most 120 volt pressure washers are limited by low flow, low cleaning speed, or the need for a dedicated 20 amp outlet. This unit solves that problem by using two separate 115/120 volt power cords, allowing it to produce performance normally expected from larger commercial electric pressure washers without requiring a 230 volt receptacle.

Why This Machine Is Different

- 6720 cleaning units: 2100 PSI — 3.2 GPM = faster cleaning speed
- Runs from two regular 120 volt outlets
- No 230 volt outlet required
- No gasoline engine fumes for indoor or outdoor use
- No hard starting, no pull cord, no gas maintenance
- Built-in circuit locator light helps confirm correct outlet connection before use
- Adjustable pressure unloader lets you reduce pressure and amp draw when needed
- 50 ft commercial pressure hose included
- Commercial spray gun, lance, nozzle set, gauge, inlet filter, and thermal relief valve included

Performance Comparison

Machine Type
Typical Power
Approx. Cleaning Units

>

Small 115V electric pressure washer
Single 15 amp outlet
About 2400 cleaning units

Larger 115V electric pressure washer
Single dedicated 20 amp outlet
About 3000 cleaning units

Clean Storm 20131411
Dual 115/120V outlets
6720 cleaning units

Cleaning Units = PSI \times GPM. Higher cleaning units usually means faster rinsing, faster soil removal, and less time spent cleaning large areas.

Best Uses

- Shop floors
- Garages
- Concrete cleaning
- Tile and grout cleaning
- Decks and patios
- Vehicle and equipment washing
- Indoor pressure washing where gasoline engines cannot be used

Included Equipment

- Clean Storm 20131411 pressure washer assembly
- Heavy-duty commercial electric motor
- Legacy 3.2 GPM \times 2100 PSI pump or equivalent
- Dual 115/120V power cords
- Pressure unloader valve
- Pressure gauge
- 50 ft pressure hose with quick connects
- Commercial trigger gun
- 36 inch pressure washing lance
- Quick-connect spray nozzle set
- Garden hose inlet filter

>

- Thermal relief valve
- Powder-coated steel cart with large rear wheels

Important Electrical Note

This pressure washer is designed to operate from two separate 115/120 volt wall outlets. For best performance, the outlets should be on properly wired separate circuits. The built-in indicator light helps confirm proper connection before operation.

Do not use undersized extension cords. Always verify outlet condition, circuit capacity, and proper wiring before use.

Why Buy This Unit?

If you want gas-engine-like cleaning speed but need to work from regular wall power, this is one of the strongest options available. It gives you the convenience of electric operation with far more cleaning speed than ordinary 120 volt pressure washers.

Bottom line: If you need serious cleaning performance without gasoline fumes or a 230 volt outlet, the Clean Storm 20131411 is built for that job.

Clean Storm 6720 Cleaning Units 2100 psi 3.2 gpm Cold Electric Pressure Washer

The world's strongest 115 volt pressure washer!

Plug in everywhere 2 Power Cords 115 Volts!

No need to hunt down dedicated 20 amp breakers!

No special 230 volt outlets needed!

Every home, every business has 15 amp outlets and can run this pressure washer!

No green house gases, No gasoline needed. No gas engine maintenance.

No pulling and engine cord.

No hard starting.

Starts every time!

Runs on two 15 amp regular wall outlets.

Ready to work all day when you are.

Built in circuit breakers.

Built in circuit locator informs you that you are plugged in correctly before you turn on the pressure washer.

1st high pressure, high cleaning unit, that plugs in everywhere!

Use indoors or outside.

Built in dial in pressure unloader to adjust the pressure and amp draw from 0 psi 5.7 amps to 2100 psi/ 16.8 amps.

Heavy duty hose, lance, and power cord storage hooks on handle and frame base.

Heavy Duty Powder Coat Steel Frame, Over-sized Rear Wheels, Rubber Front Feet,

>

Spray Jet Storage Rack.
Longer 50 ft pressure hose, longer lance than other electric cold models.
Perfect around the shop, home, deck, cement, tile, car cleaning

You will love this pressure washer.
When you squeeze the trigger on this tool the lance has some real 'kick' to it.
Super impressive!

Note: Power cords need to be non GFCI and on separate phases.

>

Includes:
Clean Storm Pressure Washer 4.0 Nozzle Set Set

(unit will accept 4.5 nozzles as well)

Includes:
Hydrotek DH050 Pressure Wash Hose 50 ft 3/8" Single Wire with QDs 3000
psi 250 degree
or similar

Includes and installed
Switch Toggle Stainless W/ Spade Connect Single Pole Single Throw
Approved for 20 amp 125 volts or 12 amps 250 volts

Turns on and off the 230 Volt power to the Motor

Installed
Clean Storm Stainless Steel Momentary Push Button Switch ON
When you hold down button and the green light turns on, you know you
plugged in your pressure washing into the correct two wall outlets.

>

Includes Installed
Thermal Relief Valve 145 Degrees F 3/8" Mip X 1/4" Plastic Barb Control
Devices Inc
Protects pump seals in bypass mode from over heating.
For indoor use, install 1/4" ID hose from barbed fitting to sink drain.

Includes Installed:
General Pump Inlet Water Filter 3/8" Mip (Npt) X 3/4"Garden Hose Swivel
8.710-145.0

Factory Installed: Gauge 0-3000 Psi Stainless Steel Back Mount 8.710-258.0

Used to be an option but now currently included for listed price
Makes it super easy to adjust the water pressure for indoor or outdoor use.

BE Pressure Supply: High Pressure Up Stream Soap Injector 85.400.003

Please note to mis-adjust or over adjust an upstream injector will shorten the life of the pump so it is always recommended to prespray your cleaners with a pump up spray or similar and use your pressure washer without an up-stream injector.

Little Giant 3HTLPSQXP 120,000 BTU Propane Heater (Extreme Pressure)

Turn your cold pressure washer into a hot unit.

Question: How did you get a 16 amp motor to run on 15 amp breakers?

Answer: We enlarged the jet size from 3.5 to 4.0 and the majority of the USA has 120 volt outlets that makes this motor run on 240 volts instead of 230 volts.

These two factors ensure it runs on 15 amp breakers. You can also further lower the amp draw by lowering the pressure. Pressure washer motor turns on at at 5.7 amps and then for every 300 psi you ask it to push adds one amp draw. Example 1500 psi = 12.5 amps per cord.

>

Clean Storm 6720 Amp Draw VS Pressure

500 psi
6.6 amps

1000 psi
8.9 amps

1500 psi
12.5 amps

2000 psi
16.1 amps

2100 psi
16.8 amps

Maintenance:

Change oil on pump after 50 hours then every 200 hours of use.

Grease zerk fitting on electric motor every 200 hours of use.

Do not allow to freeze.

Blending the power of your two power corded portable carpet cleaning machine.
