DSC Products Fibre-Tec OMS 32 oz with Trigger Sprayer

Fibre-Tec OMS
Solvent Fabric Protector

- A solvent based fluorocarbon solution that imparts a durable stain and soil protection to all treated colorfast fabrics. Treated fabrics will have excellent water and oil repellency and will resist re-soiling by airborne and impacted soils.
- Apply evenly using an appropriate sprayer. The fabric should be clean, but if wet should contain no more than 50% water.
- OMS dries to the touch in less than one hour, but is not fully effective for 12 hours.
- Do not dilute. One gallon will cover 600 sq. ft. of fabric. One pint will cover a 6 ft. sofa.
- A colorless, clear liquid with a petroleum odor.
- If stored cold for a long period, shake well before using.
- Flash point – 130°F.
