Manufacturer: RHG Reach Higher Ground

Tucker Water Fed Brush | Tucker® Alpha Glide - 4 Pencil Jets Standard Size 11in x 3in Synthetic Bristles

Description

We consider this brush to be the best overall brush you can choose for window cleaning.
The Tucker® Alpha GLIDE brush is the new standard in Water Fed brushes. This premium synthetic bristle window cleaning brush is built around our dual trim, 4 pencil jet brush but with some serious additions that even the most seasoned window cleaning professional will appreciate. It includes an over the top rinse bar as well as our swiveling gooseneck. This setup allows complete flexibility in cleaning to your specific style. You can choose to rinse directly through the 4 internal pencil jets, the over the top rinse bar, or using a Y-adapter you can use both at once. The swiveling gooseneck allows the experienced professional to rock the brush back and forth on the surface of the window, while maintaining contact and rinse power.
Unlike boar bristle brushes which will shed and lose bristles over time, this new GLIDE brush will perform like boar, but last you much longer. This is a synthetic material designed to out perform boar bristle brushes.
Available in 2 sizes - the standard (made for more of a residential size window) and the XL (made for more commercial size windows and solar panels)
Note: The rinse bar is not typically intended to be run simultaneously with the brush jets. To do this, you would need to attach an additional 5/16" Y Fitting and a few inches of standard 5/16" OD Pole Tubing. A kit for this is available HERE.
Details:

- Made in USA
- Synthetic Bristle Material
