Mosmatic 34.611, DGR4-50 Hi-Flo Swivel, Quadruple Bearing Stainless, 2in Fip X 2in Mip

Model Number: 34.611

Mosmatic 34.611, DGR4-50 Hi-Flo Swivel, Quadruple Bearing Stainless, 2in Fip X 2in Mip

Manufacturer: Mosmatic

Mosmatic 34.611, DGR4-50 Hi-Flo Swivel, Quadruple Bearing Stainless, 2in Fip X 2in Mip
Description
The Mosmatic DGR Swivel - 34.611 is a robust stainless steel swivel designed for high-pressure, high-flow applications requiring both thrust and radial force handling. Built for industrial and food service environments, this swivel features a quadruple bearing system—including two radial and two thrust ball bearings—for optimal rotational performance and durability under load. Its stainless steel construction ensures long-term corrosion resistance, making it ideal for harsh operating conditions involving chemicals, water, or cleaning agents.
Applications

- High-pressure industrial fluid systems
- Food and beverage sanitation and processing lines
- Chemical transfer and mixing systems
- High-flow automated washdown and spray equipment

Features

- Stainless steel body for maximum corrosion resistance
- Quadruple bearing system: 2x radial + 2x thrust ball bearings
- Engineered to handle both radial and thrust forces
- High-flow capacity for demanding operations

Specifications
Pressure: 3000 psi
Temperature: 40°F - 180°F
RPM: 70
Material Type: Stainless steel
Inner Part: Stainless steel
Seal: O-ring NBR
Throughput/medium: ph 3-12 / filtered 10 microns, compressed air (290 psi)
Thread In: G1 2"NPTF
Thread Out: G2 2"NPTM
Nominal Width (NW): 2"
