HydraMaster 000-157-0801 Water Box Float Valve

#21 in the drawing below
and number 19 in the bottom photo.

Note this part number has change over the years. On the line drawing below you will see that these float have been used to turn the truckmount off if the water box fails to fill with water.

105 degree C

100 psig Max

240 vac .14 amp

120 vac .28 amps

2 wire leads

24vdc .28 amps

One of the things you will notice: Same part number is used on both machines but the part is different from the thumb nail.

Thumb nail image includes the float and arm. The bottom photo is just for the float without the arm.

HydraMaster 000-157-0801 Water Box Float Valve for Boxxer 4.6 4.8

Part #3 in above drawing.

Used to turn machine off if the box runs out of water.
