- Technical Specification

:

- Primary cord (20 amp) runs (2) vac motors in air series with ball float shutoff and sump pump. If a secondary circuit is not available, machine would perform on this cord. Wired with an in-line GFCI and cooling fan.

 - 2" vacuum intake.
 - Stainless steel screen lint catch to protect your auto dump pump.
 - Garden hose cam lock adapter for carpet and tile cleaning
 - 1-1/2" cam lock adapter for flood restoration (seen in photo below)
 - (5) Green lighted splashproof rocker switches.
 - Blue tank/Grey base
 - 250 C.F.M.'s
 - 170" of Lift (normally dual 2 stage in series would only achieve 155" of lift but these MaxVac vacuum motor are actually performing 170" in series! This is one of the reasons we chose this set up. These are not inflated numbers!)
 - 42,500 vacuum units (maximum 170 inches of lift X maximum 250 CFM) make this one of the strongest electric machines on the market
 - Gallon of liquid defoamer can be set on top of extractor on jobs where you need to cut some suds. (auto dump systems only dump water and not bubbles)
