Mosmatic 66.059, DKP Inline Car Wash Ceiling Boom, 7ft 5inches

Manufacturer: Mosmatic Pressure Washing Equip

Mosmatic DKP 66.059 Inline Car Wash Ceiling Boom 7ft 5inches

#### Streamlined and efficient

This classic streamlined inline ceiling boom can be put to work in numerous industrial sectors such as car washes, food industry, manufacturing and assembly lines. This versatile component is useful in a variety of settings. It shows its full potential anywhere that liquids, gases or air are being used.

#### Rotates 360°;

The boom can be endlessly rotated 360° on its axle. This allows you to effortlessly reach every area with the boom around the object being washed. This ceiling boom is often combined with an additional wall boom.

#### Your choice of inlet and outlet points

All Mosmatic ceiling booms are fitted and delivered with a standard G1/4" inner and outer screw thread. We can also fulfil individual requests and offer a variety of thread sizes and types. An additional fitted connection to the fluid supply guarantees maximum freedom of choice and can be adapted to any individual self-service car wash system.

#### High quality swivels

Top quality ensures a long life! All the internal parts are made of stainless steel. They are maintenance-free and easy turning even under high pressure.

#### Hose protection / tension relief

During minimum to normal pressure on the boom, special hose protection provides optimal stress relief. In addition to hose protection, the optional tension relief lessens extreme pressure on the boom.

#### Well insulated

The high-pressure hose housed inside the boom is also protected with insulation against heat and cold.

#### Polished stainless steel (inox)

>

A strong and visually elegant design are a priority for all Mosmatic products. We use polished stainless steel (INOX) for all our products protecting them from rust and extreme weather conditions.

Ready to install

All Mosmatic booms are delivered pre-assembled. You can install the booms yourself by following the enclosed instructions. The boom is ready for immediate use after being connected to the media supply.
