USING THE FORZA STEAM CLEANER FOR KILLING BEDBUGS

The Vapamore MR-1000 Forza produces steam with an output temperature between 210- 240 degrees. Pests such as bedbugs, dust mites and other allergens along with their eggs are killed on contact at a temperature of 180 degrees. Using steam is an extremely effective method for killing bedbug and their eggs. as well as bacteria and viruses without leaving any harmful chemical residue behind.

The tools supplied with the Vapamore MR-1000 Forza allow you to treat all areas where these pests can hide such as bedding, sofas, furniture, pillows, carpet, cracks and crevices that are
ideal hiding places for pests.

The clothes / fabric tool with the cotton cover is ideal for treating bedding, furniture, pillows, and carpet areas around bed posts and base boards. Start by installing the supplied cotton cover on the clothes - fabric / smooth surface tool. Apply light consistent pressure and slowly pass it along the surface (1” per second) to insure the area being treated has a chance to come to full temperature killing pests and their eggs.

The floor cleaning head with micro fiber cover is also great for treating large

Vapamore MR1000 Forza Commercial Grade Steam Cleaning System Freight Included MR-1000

surface areas such as bedding, furniture, and carpet areas. Start by installing the supplied micro fiber cover on the floor cleaning head. The micro fiber cover thermal core maintains full temperature during use and allows the floor cleaning head to glide over fabric or carpet.

Apply light consistent pressure and slowly pass it along the surface (1’’ per second) to insure the area being treated has a chance to come to full temperature killing pests and their eggs.

The detail adapter can also be used on its own as a straight jet nozzle tool or along with the 90 degree jet nozzle attachment. These tools are great for cracks and crevices. Make sure to concentrate the steam directly on the area to be treated with as minimal distance as possible, no more than 1’’ away. The steam will condense and cool off and not be effective to kill pests and their eggs if the jet tip is not directly on the surface being treated. The detail adapter can be attached directly to the steam gun or to any of the extension tubes.

MR-1000 Forza Commercial Grade Steam Cleaning System
In Italian, Forza stands for ‘strength & power.’ Performance, endurance, and total value - are the crown features of the MR-1000 Forza Commercial Grade Steam Cleaning System. Over two years of intensive development and testing were dedicated to create its robust design, resulting in one of the most innovative steam cleaners the industry has ever seen.

All over the world, MR-1000 Forza has greatly improved commercial cleaning for hundreds of business owners with star-quality restaurants and kitchens, auto shops and detailing, hospitals, residential care homes, and more. Experts in pest control have also found incredible value in the MR-1000 chemical-free treatment against bed bugs, dust mites, mold, and other allergens.

The Forza infuses custom Italian manufactured CEME® brand internal components with commercial grade powder coated steel construction, continuous steam flow, computer controlled operation, and the largest
selection of included accessories on the market. A specially designed extra large stainless steel boiler with 1700-Watt heater and 90 psi steam output enhance the power and execution of this world-class product.
