Legend Brands Chemspec 116331 Enz-All Enzyme Carpet Prespray - 24 lb Case, 4 x 6 lb Jars
Chemspec Enz-All is a professional-strength powdered enzyme prespray designed for heavily soiled, water-cleanable synthetic carpet. Its concentrated blend of enzymes, detergents, builders, and water-conditioning ingredients helps break down difficult organic soils, food residue, grease, body oils, and other protein-based contamination before hot-water extraction.
Enz-All is especially popular for restaurant carpet, apartment turnover, hotels, healthcare facilities, residential restoration cleaning, and other locations where ordinary carpet presprays may not provide enough cleaning power.
This listing includes one factory case containing four 6 lb jars for a total of 24 lbs of concentrated powder.

Product Features

- Professional powdered enzyme carpet prespray
- Helps break down protein-based and organic soils
- Excellent choice for food grease, body oils, and heavily soiled carpet
- Recommended for commercial and residential carpet-cleaning applications
- Can be used as a general prespray or concentrated protein spotter
- Concentrated powder provides economical cost per mixed gallon
- Factory-sealed jars help keep unused powder dry
- Manufactured for Legend Brands under the Chemspec product line

Recommended Applications

- Restaurant and food-service carpet
- Apartment and rental-property turnover cleaning
- Hotels and hospitality facilities
- Nursing homes and healthcare facilities
- Schools and institutional buildings
- Residential carpet with heavy body oils or food contamination
- Traffic lanes and heavily soiled commercial carpet
- Protein-based spotting and prespray applications

How Enzyme Presprays Work
Ordinary detergents loosen and suspend soil, while enzyme cleaners are formulated to help digest certain organic and protein-based contamination. This makes Enz-All

Legend Brands 116331, Chemspec C-EA24, Enz-All, Powder Clean, 24 lbs /Case 4/6 lbs Jars Enzall Freight Included

particularly useful for carpet affected by food residue, body oils, grease, and other difficult organic soils.
For best results, mix the product with warm water according to the current container label, apply evenly, allow adequate dwell time, agitate when appropriate, and rinse thoroughly using professional hot-water extraction equipment.

General Mixing and Use Information
Always follow the current instructions printed on the product container. Mixing directions may vary based on the application, soil level, water temperature, and equipment being used.

- Use as a carpet prespray for normal to heavily soiled synthetic carpet.
- Use warmer mixing water when permitted by the label to help activate the powdered formula.
- Allow adequate dwell time before extraction.
- Agitate heavily soiled traffic lanes when appropriate.
- Do not allow the prespray to dry on the carpet.
- Rinse thoroughly with an appropriate carpet extraction rinse.
- Mix only the amount of solution expected to be used during the work period.

Important: Enzyme activity may decline after the powder has been mixed with water. Freshly mixed solution generally provides the best performance.

What You Receive

- Quantity: 1 case
- Case contents: 4 jars
- Container size: 6 lbs each
- Total product weight: 24 lbs
- Product: Chemspec Enz-All powdered enzyme prespray
- Manufacturer part number: 116331
- Chemspec reference: CEA24

Commonly Compared Products
Chemspec Enz-All is commonly considered by professional cleaners who are also evaluating other heavy-duty powdered carpet presprays and enzyme cleaning products.

- Bridgepoint Bio Break
- Prochem powdered carpet presprays
- HydraMaster powdered presprays
- Restaurant grease carpet presprays
- Professional protein and organic-soil treatments

directions, intended surfaces, dilution ratios, enzyme content, pH, and manufacturer recommendations before selecting a cleaning chemical.

Frequently Asked Questions
Is Enz-All intended for restaurant carpet?
Yes. Restaurant carpet and other locations with food grease and heavy organic soil are common applications for a professional enzyme prespray such as Enz-All.
Does this product contain enzymes?
Yes. Enz-All is formulated as a powdered enzyme cleaning product intended to help break down difficult protein-based and organic soils.
Can Enz-All be used as a spotter?
It may be used for certain protein-spotting applications when mixed and applied according to the manufacturer’s current label directions. Always pretest the material being cleaned.
Can I mix the product ahead of time?
Freshly mixed solution normally provides the best enzyme performance. Mix only the amount expected to be used and follow the storage and disposal instructions printed on the container.
Can this be used on wool carpet?
Do not assume that a strong enzyme prespray is suitable for wool, natural fibers, or specialty textiles. Check the carpet manufacturer’s cleaning requirements and the current Enz-All label before use. When uncertain, select a wool-safe cleaning product instead.
Will it remove every stain?
No cleaning chemical can guarantee removal of every stain. Results depend on the type of contamination, carpet fiber, age of the stain, previous cleaning attempts, heat exposure, color loss, and whether the contamination has permanently altered the carpet.
Should the carpet be rinsed after application?
Yes. Enz-All is normally used as a prespray and should be thoroughly extracted and rinsed according to the manufacturer’s directions.

Professional Use and Safety Information

- Read the current product label and Safety Data Sheet before use.
- Wear appropriate personal protective equipment.
- Avoid breathing airborne powder while measuring or mixing.
- Pretest carpet and fabric in an inconspicuous location.
- Confirm compatibility with stain-resistant carpet and specialty fibers.
- Do not mix with other chemicals unless expressly permitted by the manufacturer.
- Keep the container tightly closed and store the powder in a cool, dry location.
- Keep out of reach of children.

Shipping Information
Shipping is included to qualifying commercial and residential addresses within the

Legend Brands 116331, Chemspec C-EA24, Enz-All, Powder Clean, 24 lbs /Case 4/6 lbs Jars Enzall Freight Included

contiguous United States unless otherwise stated during checkout.
Additional charges may apply to Alaska, Hawaii, U.S. territories, international destinations, limited-access locations, remote areas, or addresses requiring special delivery services.

Ordering Notes
Product packaging, label design, jar color, and case appearance may change without notice. The factory may ship the newest available packaging while retaining the same manufacturer part number and intended product.
Please confirm that this is the correct chemical, container quantity, and case size before ordering. Cleaning chemicals may be subject to return restrictions, restocking charges, and loss of outbound or return shipping costs.
Legend Brands Chemspec 116331 Enz-All Powdered Enzyme Carpet Prespray
Case of four 6 lb jars
24 lbs total product
Powdered Enzyme Pre-spray Incorporating Proteolytic Enzymes Specifically Formulated For The Removal of The Toughest Protein Greases, Oils, and Soils Typically Found In Food Service, Hospitality, Healthcare, and The Home.

For Use On All Protein Related Stains. Effectively removes blood, vomit, grass, and food stains from carpet. Spray onto the carpet, work in, and extract. Enz-All has also been found to be extremely effective in removal of urine and feces stains

Cuts Through Food Grease Fast With a ready to use pH 11.4, Enz-All is hot enough to cut through difficult food grease problems, even the grease that defies high-pressure extraction. When used as a pre-spray, Enz-All will break down the thickest, caked-on kitchen grease or the thinnest body oils with ease.

Doubles As a Spotter. To use as a protein spotter, mix one scoop of Enz-All to one-quart hot water. Enz-All works well even at room temperatures and is superior in performance on all food-related stains.

Long Shelf Life Enz All has an indefinite shelf life when undiluted. Once diluted, Enz-All is effective for 12 to 24 hours. For fastest action, greatest cleaning, and quickest emulsification, always mix fresh.

Product ships in different color plastic bottles and labels but all are the same formula.
