Description
Used for dog grooming, pest control, sanitizing, disinfecting, and deodorizing. The heavy-duty foggers are used for many applications around the world including building restoration, dog grooming, air duct cleaning, and insect control. They are ideal for most industrial and Jan-San applications because of their compact size, stability, and the 1.5 gal. capacity. Includes easly lift handle and tank is rated for 65 lbs of use but this item weight with 1.5 gallons of disinfectant is only are one-piece construction. The adjustable droplet size range from a power-mist (56 micron droplets) to ULV (20-35 micron droplets). The output and droplet size of these models can be easily selected with the adjustment knob on the nozzle.

Century Wire and Cable Pro Lock Extension Power Cord 14-3 X 50 ft with 5-15P and 5-15R Ends D14414050BL D11714050YLPLBK

ATTRIBUTES:
• Used to treat airspace with either water- or alcohol-based formulations. Alcohol-based formulations produce smaller sized droplets.
• Can be adjusted to generate particles in the 8-15 micron size range.
• Droplets can stay suspended in air for five or six hours instead of a few minutes with a wet fogger/ mister, allowing for better penetration.
• Chance of over-wetting materials is greatly reduced when compared with wet (tri-jet) foggers.
Can be left un-attended by storing the nozzle under the pail lift handle as seen in photo to the right.
