Model Number: 20170914

Electrical Converter 230 volt 3 wire 10-30p 30 amp TO 115 volt 4 gang GFCI (8 outlets) 5-15R Adapter 20170914

Manufacturer: SteamBrite MFG

This converter plugs into the standard 3 prong 230 volt electric dryer outlet, commercial coffee machine plug, or water heater outlet and converts the power to 115 volt outlets that can handle 15 amps per gang or 7.5 amps per receptacle. Four items drawing 15 amps each or eight items pulling 7.5 amps each. This add up to 60 amps of power at 115 volts. This is enough to run 8 commercial dehumidifiers or an electric truckmount like the Enterprise. This converter is included with the purchase of the Enterprise Electric Truckmount start up package. This converter makes it convenient to operate all four power cords on one outlet.

No circuit breakers on this model. Please do not overload the unit!

Temporary power distribution box  
Construction spider box

Note: User assumes all responsibility on use. It is the users responsibility to check the inbound voltage, outbound voltage, and total amp draw to verify these are not going to be overloaded. The user agrees to test the amp draw of any appliance or machine that they plug into these converters to ensure they are not being overloaded. Meters are cheap and mistakes are expensive. You can purchase a meter at <http://www.steam-brite.com/voltage-meter-multitester-p-6259.html> User agrees to hold Steam Brite, its employees, and agents harmless in the event of any use of said use of converter. The user agrees to not hold SteamBrite and all employee against any problems that arise out of the use of said converters. Remember, just because it plugs in does not mean it is OK to use!

Optional

Extension Power Cord 230 Volt 50 ft 10 gauge 3 wire 10-3 with ends installed 10-30P to 10-30R
