Manufacturer: Powr-Flite

The Whole Room Dryers!

New Professional Downdraft&trade; Whole Room Dryer/Axial Fans

No more drying a room, one section at a time. One dryer will dry an entire room in as little as 15 minutes. Dryers or air movers are typically spaced around a room in various positions to take advantage of walls and other surfaces to dry carpets as quickly as possible. But, a typical dryer has limited surface coverage and does not take advantage of the warm air at the top of a room. The new Downdraft&trade; dryers by Powr-Flite changes drying as we know it. No more leaving damp carpets to dry after you leave a job! The fan blades are precision pitched to pull warmer, drier air down, through the dryer, blowing it across the entire room for fast complete drying with only 1 dryer for the "whole" room.

The commercial "Whole" room dryer!

Downdraft&trade; drying takes advantage of the warmer air circulating at the top of a room, pulling it down, through the Downdraft&trade; and blasting it out over every square inch of the room, drying the carpet fast.
