Announcing the GE Protimeter Restoration Kit

The Ultimate Combo
With the GE Protimeter Restoration Kit you get both the updated full-range MMS Plus and Hammer Probe. Both units come packaged together in a heavy-duty carrying case.

The full-range MMS Plus is three meters in one, with hygrometer, pin and pinless measurement modes. It measures 0-100% RH and 32-122° F with the Humistick™ probe, providing temperature, dew point, GPP, moisture content and data logging. And it can store and download up to 1,000 measurements.

The restorer-tested GE Protimeter Hammer Probe works with the MMS Plus to measure moisture in structural materials like sub-floors and framing.
