Clean Storm CE1242, ULV Fogger, and Case of Sanitizer Package

Quick Overview
Cleaning the interior of an air system is half the job. For a thorough job, the system should be decontaminated by fogging it with an EPA registered sanitizer and a sealant to retard biological growth and prevent any residual debris from migrating into the occupied area.

Product Description
Cleaning the interior of an air system is half the job. For a thorough job, the system should be decontaminated by fogging it with an EPA registered sanitizer and a sealant to retard biological growth and prevent any residual debris from migrating into the occupied area. The all new Model 2600 provides a well controlled cold mist from a stable low slung, self contained case with a plastic handle to provide ease of operation and electrical isolation. The Fogger will disperse Sporicidin , and Microban Botaniclean to decontaminate residential and commercial air systems.
