- EASY OPEN, EASY CLEAN, HARD DEBRIS TRAY COLLECTS HEAVY PARTICLES LIKE PAPER CLIPS ALLOWING ONLY FINE DUST AND LINT TO ENTER VACUUM FAN AND TOP FILL, DISPOSABLE BAG

- 50' DETACHABLE POWER CORD - 15 AMP CIRCUIT OPERATION

Referring to pre-vacuuming, the IICRC "Carpet Cleaning Standard" states: "Overall dry vacuuming of high-traffic and open areas is essential. An upright vacuum, or pile lifter, which incorporates high-velocity suction and nap agitation is specifically recommended."

The HydroForce Pile Lifter is the ultimate professional vacuum. This is a well-built unit which not only utilizes extremely high suction, it adds the benefits of a large cylindrical brush which lifts, combs, and brushes the carpet pile. Versatility of the pile lifter ranges from standard vacuuming needs to heavy-duty uses such as removal of broken glass or construction materials. It employs a trap door which protects the motor from large debris, while allowing lint, dust, and fine particulate matter to reach the bag.

HYDRO-FORCE PILE LIFTER
Item No. MA29 /
1630-2844

The New Hydro-Force Pile Lifter provides extreme soil removal of dry particles imbedded in carpet fibers and extreme pile lifting capabilities.
