SEE THE SPARK!

Total Zone ozone generators are the most modern, technically advanced systems on the market today. Total Zone TZ-1, TZ-2, TZ-4 & TZ-8 use a patented corona discharge technology known as "SP-ARC", Silicate Polarized Arc. This new process allows the Total Zone ozone generator to produce much higher levels of ozone than any competitive model with little or no maintenance. The TZUV-300 & TZUV-600 use a proprietary UV Chamber with high output UVC lamps. All Total Zone ozone generators are designed and built for the utmost reliability in the harshest environments.

Works on Formaldehyde, Benzene, Ammonia, Radon too!
