Manufacturer: Pumpteck

this pump has been replaced with the 114T. This assembly with the M35 motor has been replaced by part number: 80555.

Series 114V Pump w/ M35 Motor 120 Volt 200 PSI

120 Volt, 200 PSI (recomended) Spray, '03 Nozzle (not included),
.67 GPM Spray, 1.2 AMPS Spray, 10 lbs

EFFICIENCY

The plunger type design of the 114 is the most efficient way possible to pressurize water. PUMPTEC® efficiency produces up to 20% more pressure or flow for a given power input compared to some competitors' pumps.

MAINTENANCE & SIMPLICITY

Factory lubricated for maintenance free performance. The only tool needed to completely disassemble the pump to its basic components is a simple hex wrench.

DURABILITY

Durability results from exclusive use of premium materials. All metallic wetted parts (except body) are stainless steel or chemically resistant plastic. The plastic pump body is nearly indestructible compared to pumps made of castings. Precision molded plastic body offers chemical compatibility with a wide variety of chemicals.

VERSATILITY

>

Flow and pressure can be optimized to exactly match power input to nozzle size by customer selection of the precise eccentric offset.
