SONOZAIRE OZONE MACHINE 5 G A41180

With a high CFM and compact size, the model 5G is a perfect fit for restoration companies, hotel/motel owners, auto detailers, etc. The model 5G is a powerful ozone generator designed to destroy and quickly eradicate on-site odor problems.
By generating a stream of odor-destroying ozone from the oxygen in the air, this unit converts smoke odors into harmless, odorless CO2 and water vapor. Odors from smoke damaged carpets, etc. are banished forever. Then, the unused ozone simply reverts back to ordinary oxygen, leaving no perfume or unpleasant fragrance behind!

- Heavy duty ozone unit has been designed for the professional user, so don’t be surprised if the treatment time is less than you expect
- Operates by simple adjustment of a 12-hour timer
- Outputs 5 grams per hour and 239 cfm
- Treats areas 6,000 to 150,000 cubic feet
- Minimal maintenance
- Small and lightweight
- High ozone outputs
