CTI Proschoice Dry Max Downdraft Air Mover

Manufacturer: ProsChoice

CTI Proschoice Dry Max Downdraft Part 4152 2 speed, 1/4HP 3500 CFM

EDIC's brand new Aqua Dri hosts a series of exclusive features that put it far ahead of the pack and make it indispensable for quick drying of carpet and hard floors. The Aqua Dri's unique body design makes it super easy to stack for storage or transport. There are two models to choose from: The standard unit offers three-speed drying with a $\frac{1}{2}$ HP motor and 2400 CFM. The larger Aqua Dri Pro offers three-speed drying with $\frac{1}{2}$ HP (2700 CFM) for the ultimate in power. Both models can be easily adjusted to four different positions for drying carpets, furniture, curtains, ceilings—you name it! Available with optional carpet clamp.

Aqua Dri Pro / 1/2 HP / 10" fan -

Aqua Dri offers 3 speed drying with adjustable front legs, a variety of operating positions, and is compact and stackable.

• 2,500 cubic feet per minute of air movement. Aqua Dri's advanced aerodynamic interior design and high efficiency 1/2 HP motor result in the best working CFM in the industry today and as a result produce the quickest drying.

• The molded carrying handle on the Aqua Dri is designed with perfect weight distribution for a lightweight feel and ease of operation.

• Specially molded Lexan side screens are virtually unbreakable and will not rust or bend. They also have more open area than metal screens, allowing more airflow, increasing CFM and enhancing drying power.

>

• The high efficiency 1/2 HP motor draws only 5 amps, allowing 3 units to run on one circuit.

• Stands in 3 positions. Horizontal for most applications – vertical for ceiling and drapes – and with its kickstand up to soften air pressure for hard floor drying.

• The variable speed switch allows you to adjust the Aqua Dri’s airflow to fit different jobs.
