Husqvarna 967664101 T 7500 HEPA Dust Extractor 230V 3-Phase Formerly Ermator T7500 200600404M GTIN 805544261678

Model Number: 967664101

Husqvarna 967664101 T 7500 HEPA Dust Extractor 230V 3-Phase Formerly Ermator T7500 200600404M GTIN 805544261678

Manufacturer: Husqvarna Construction Products

Husqvarna 967664101 T 7500 HEPA Dust Extractor 230V 3-Phase – Formerly Ermator T7500
Husqvarna Part Number: 967664101 (back ordered until after 1/21/27)
Model: T 7500
Former Brand Name: Ermator T7500
Legacy Reference: 200600404M
GTIN: 805544261678
Power: 230 Volts, 3-Phase
Rated Input Power: 10.1 HP / 7.5 kW
Factory Color Notice: The factory may ship this machine in any current production color. The present default production color is generally orange, but the unit may arrive in orange, red, gray, black, or another factory-selected color without notice. Color does not change the machine's part number, specifications, performance, or factory warranty. Please order by part number 967664101 and not by the color shown in the product photographs.
Heavy-Duty Industrial HEPA Dust Extraction
The Husqvarna T 7500, part number 967664101, is a powerful three-phase industrial dust extractor designed for demanding concrete grinding, surface preparation, demolition, cutting, and dust-control applications. This machine was formerly sold under the Ermator name as the Ermator T7500 and may also be associated with the older reference number 200600404M.
The T 7500 is designed to support large grinders and other high-production equipment that generate substantial amounts of fine concrete and construction dust. Its quiet but powerful turbine motor delivers strong airflow and vacuum performance for continuous commercial and industrial use.
The machine can handle difficult materials including concrete grinding dust, demolition debris, fine construction dust, and other dry materials produced during surface-preparation work. Its heavy-duty construction, large filtration capacity, stable chassis, and mobile design make it suitable for transport between commercial jobsites.
Designed for Large Surface-Preparation Machines
The Husqvarna T 7500 is commonly used with large concrete grinders, shavers, scarifiers, shot blasters, floor saws, and similar dust-producing equipment. It is particularly well matched to the following Husqvarna grinders:

- Husqvarna PG 820
- Husqvarna PG 680
- Husqvarna PG 400 three-phase models

Husqvarna 967664101 T 7500 HEPA Dust Extractor 230V 3-Phase Formerly Ermator T7500 200600404M GTIN 805544261678

- Large planetary concrete floor grinders
- Concrete shavers and scarifiers
- Shot-blasting machines
- Concrete and masonry saws
- Industrial surface-preparation equipment

Always compare the dust outlet size, airflow requirements, electrical requirements, and intended application of your equipment before ordering.

High-Capacity Filtration System

The T 7500 features a high-efficiency filtration system designed to collect large amounts of fine dust while maintaining dependable airflow and long filter life. The system uses sock-style prefilters together with two oversized, individually tested and certified HEPA Class H13 filters.

Its cyclone-style separation and large filter area help reduce the amount of dust reaching the final HEPA filters. The machine's prefilters are cleaned from outside the collection tank using the Jet Pulse negative-pressure filter-cleaning system. This allows the operator to clean the filters without opening the dust compartment.

The T 7500 offers approximately 20 percent more filter capacity than its predecessor, the Ermator T75.

Jet Pulse Filter Cleaning

The Jet Pulse system provides fast and effective cleaning of the primary filters. Regular filter cleaning helps maintain airflow, reduces unnecessary filter replacement, and supports longer periods of operation during grinding and surface-preparation work.

Longopac Continuous Bagging System

The Longopac® continuous bagging system allows collected dust to be sealed into manageable sections for cleaner disposal. The operator can close and replace a section of bagging material while minimizing exposure to the collected dust.

Key Features

- Powerful industrial turbine motor
- Designed for heavy-duty and continuous commercial use
- 230-volt, three-phase electrical operation
- Approximately 353 CFM airflow at sea level
- Maximum vacuum rating of approximately 280 mbar
- Approximately 110 inches of water lift
- Two oversized, tested and certified HEPA Class H13 filters
- Sock-style primary prefilters
- Large primary filtration area
- Jet Pulse negative-pressure filter-cleaning system
- Longopac continuous dust-bagging system
- Easy-to-read airflow monitoring gauge
- Durable industrial construction
- Stable and mobile jobsite design

Husqvarna 967664101 T 7500 HEPA Dust Extractor 230V 3-Phase Formerly Ermator T7500 200600404M GTIN 805544261678

- Three-inch inside-diameter hose connection
- Suitable for concrete grinding dust and demolition materials

Documentation
Product Sheet

Specification note: Older Ermator literature and listings may contain different horsepower, weight, GTIN, plug, package, or accessory information. The current Husqvarna part number being offered is 967664101. Specifications, packaging, included accessories, electrical connections, appearance, and production colors are subject to factory change without notice.
Electrical Connection Notice
Important: This is a 230-volt, three-phase industrial machine. It is not designed to operate from a normal household receptacle or standard single-phase power source. The customer is responsible for confirming the jobsite voltage, phase, circuit capacity, receptacle, plug configuration, overcurrent protection, and all applicable electrical-code requirements before ordering.
Older versions of this listing referenced an HBL460B7W plug and a configuration identified as being supplied with a 100-amp distribution box. Because factory packages and electrical configurations can change, no distribution box, power-distribution equipment, cord adapter, transformer, generator, or electrical accessory should be assumed to be included unless it is specifically shown on the current Steam-Brite invoice or written quotation.
Electrical installation and any plug or receptacle changes should be completed by a qualified electrician in accordance with local electrical codes and the machine's current factory documentation.
What You Receive

- One Husqvarna T 7500 industrial HEPA dust extractor
- Husqvarna part number 967664101
- Factory-installed filters and standard components supplied by Husqvarna for the current production configuration

Hoses, grinder connections, floor tools, hand tools, distribution boxes, electrical adapters, transformers, extension cords, generators, replacement Longopac bags,

Husqvarna 967664101 T 7500 HEPA Dust Extractor 230V 3-Phase Formerly Ermator T7500 200600404M GTIN 805544261678

and other accessories are not included unless specifically stated on the invoice or selected as an additional option.
Former Names and Cross-Reference Numbers

- Husqvarna 967664101
- Husqvarna T 7500
- Husqvarna T7500
- Ermator T7500
- Ermator T 7500
- Pullman Ermator T7500
- 200600404M
- Former T75 replacement or successor reference
- GTIN 805544261678

The earlier Ermator name remains useful when searching for older manuals, filters, Longopac bags, hoses, repair parts, and accessories. Always confirm replacement parts using the machine's complete model and serial number.
Common Applications

- Concrete floor grinding
- Polished-concrete preparation
- Coating and adhesive removal
- Shot blasting
- Concrete shaving and scarifying
- Concrete and masonry cutting
- Demolition dust collection
- Industrial construction dust control
- Commercial surface preparation

Frequently Asked Questions
Is the Husqvarna T 7500 the same machine as the Ermator T7500?
The T 7500 was previously marketed under the Ermator name. Husqvarna acquired the Ermator product line, and the machine is now identified as the Husqvarna T 7500. Older documentation, photos, replacement parts, and accessories may continue to use the Ermator name.
What color will the machine be?
The current default factory production color is generally orange. However, Husqvarna may ship the machine in orange, red, gray, black, or another factory-selected color. Order by part number 967664101 rather than by the color or decal arrangement shown in a photograph.
Does this machine operate on normal 230-volt single-phase power?
No. This listing is for a 230-volt, three-phase machine. Confirm that the intended jobsite has the correct three-phase electrical service before ordering.
Does it include a 100-amp distribution box?

Husqvarna 967664101 T 7500 HEPA Dust Extractor 230V 3-Phase Formerly Ermator T7500 200600404M GTIN 805544261678

A 100-amp distribution-box configuration appeared in the title of an older listing. Factory packages can change, and a distribution box should not be assumed to be included unless it is specifically listed on your current quotation or invoice.
Does it include a power plug?
An HBL460B7W plug was referenced in older product information. Plug and cord configurations may change. Confirm the current electrical connection with Steam-Brite before ordering if a specific plug is required.
Can it be used with grinders from other manufacturers?
It may be suitable for other industrial grinders, saws, shot blasters, and surface-preparation equipment when their airflow, hose connection, dust-control, and electrical requirements are compatible. The customer is responsible for confirming compatibility.
Is this a wet-and-dry vacuum?
The T 7500 is primarily described as an industrial dust extractor for fine dry dust and demolition materials. Do not collect liquids, wet slurry, hot material, combustible dust, hazardous substances, or explosive materials unless the current factory manual expressly approves that use.
Freight Delivery Notice
This large industrial machine normally ships by commercial freight. Freight delivery is generally curbside unless additional services are purchased. A commercial address with a forklift or loading dock usually provides the lowest delivery cost.
Residential delivery, liftgate service, limited-access delivery, inside delivery, appointment service, redelivery, address correction, storage, and other special freight services may result in additional charges. Inspect the shipment before signing the delivery receipt and note any visible damage or shortage on the freight carrier's paperwork.
Order by Part Number Notice: Product photographs, colors, decals, plugs, cords, filters, wheels, frames, and other visual details may change during production. Images are supplied for general reference only. All orders are filled according to the part number purchased. Please verify that Husqvarna part number 967664101 is correct for your application before placing the order.
Additional Ordering Information
Factory specifications, dimensions, weight, accessories, packaging, country of origin, electrical components, and appearance are subject to change without notice. Special-order and factory-shipped equipment may require additional processing and production time.
The buyer is responsible for verifying machine compatibility, electrical service, plug and receptacle requirements, hose sizes, accessory requirements, jobsite conditions, and suitability for the intended application before ordering.
Ermator T7500 Hepa Extractor 3 Phase 230 Volts with 100 Amp Distribution Box

The T7500 Three-Phase Dust Extractors has 20% more filter capacity than it's predecessor, model T75. Don't be mislead by it's size, The T7500 Three-Phase Dust Collector is easy to transport to and from jobsites. Suitable for a wide selection of

IMPORTANT ELECTRICAL REQUIREMENT - READ BEFORE ORDERING
This Husqvarna T7500 dust extractor requires 230 Volt 3-Phase electrical power. This is NOT a standard 230 Volt household single-phase machine. Many commercial buildings have 208 Volt or 240 Volt single-phase power, but that does not mean they have the required three-phase electrical service.
Before ordering, confirm with a qualified electrician that your jobsite has:

- 230 Volt 3-Phase electrical service available
- A properly sized circuit and disconnect
- The correct receptacle and plug configuration
- Electrical protection installed according to local codes

If your building does not already have three-phase power, additional equipment such as a phase converter or other electrical solution may be required. Steam-Brite cannot determine your facility's electrical capabilities remotely.
Please verify your electrical service before purchasing. Incorrect electrical power is not considered a machine defect and may prevent operation of the equipment.

Steambrite Supply

Husqvarna 967664101 T 7500 HEPA Dust Extractor 230V 3-Phase Formerly Ermator T7500 200600404M GTIN 805544261678

Customer Says
Reality

"My building has 230V outlets."
Could still be single-phase.

"My welder uses 240V."
Many welders are single-phase and do not prove 3-phase availability.

"I have two hot wires and a ground."
That is normally single-phase.

"I can just change the plug."
A plug change does not create three-phase power.

"My electrician can make it work."
Maybe, but the customer needs to confirm before purchase.
