Patented Air Induction Tools

CFR’s patented air induction tools atomize high velocity solution at 200-1000 p.s.i. to "scrub" each individual fiber and simultaneously recover this solution to prevent over wetting. They clean carpeting, upholstery and even fabric partitions better than conventional extractors and they are more efficient than foamers or pressure washers on ceramic and other hard surfaces. The unique tool design provides total solution control with the CFR Continuous Flow Recycling cleaning system 98826
