Key Features

- Solid state timer for commercial pressure washer electrical controls
- Voltage input: 24-240VAC
- Adjustable lockout range: 5-60 minutes
- 15 second run delay listed by some suppliers
- 10 amp rating listed by some suppliers
- Used in select Karcher, Landa, Legacy, Shark, Hotsy, and Windsor equipment

Before Ordering
Electrical parts should be matched by the exact part number from your machine’s parts manual, wiring diagram, or the number printed on the original timer. Equipment manufacturers may use more than one timer style depending on model, voltage, and serial number. Display images are for reference only; orders are fulfilled by the part number ordered.
Installation Notes

- Disconnect power before servicing any electrical component.
- Installation should be performed by a qualified service technician.
- Confirm voltage, wiring, and function before applying power.
- Timer failure may be caused by upstream wiring faults, switches, relays, coils, or water intrusion, so diagnose the full circuit before replacing parts.
