Clean Storm 10-0860, Heavy-Duty 25 ft 12/3 SJTW Lighted Power Extension Cord 15A 125V, GTIN 661899102178

Model Number: 10-0860

Clean Storm 10-0860, Heavy-Duty 25 ft 12/3 SJTW Lighted Power Extension Cord 15A 125V, GTIN 661899102178

Manufacturer: Clean Storm

Clean Storm 10-0860, Heavy-Duty 25 ft 12/3 SJTW Lighted Power Extension Cord 15A 125V

Description

The Clean Storm 10-0860 is a commercial-grade 25 ft 12/3 SJTW heavy-duty power extension cord built for high-draw carpet extractors, pressure washers, and industrial cleaning equipment. Engineered with soft-drawn, bunch-stranded 100% copper conductors for maximum flexibility and minimal voltage drop under 15A 125V loads. The durable jacket incorporates cold-weather insulating compounds to prevent cracking and remain flexible in freezing temperatures. Heavy-duty molded plugs feature extra-large strain reliefs and illuminated ends, providing clear visual confirmation of active power on job sites.

Features

- High-conductivity 100% copper conductors made with soft-drawn, bunch-stranded wiring for superior durability and minimal electrical resistance.
- Heavy-duty SJTW thermo-plastic jacket rated for harsh outdoor, wet, and cold-weather industrial environments.
- Lighted female receptacle end provides immediate visual power indication for troubleshooting on location.
- Over-molded plug construction with oversized strain-relief boots protects electrical connections from wire pulling and flex fatigue.
- Cold-weather flexible compounds maintain full bendability and kink-resistance in sub-freezing operating conditions.
- Standard NEMA 5-15 grounding 3-prong plug configuration rated for 15 Amps and 125 Volts service.

Applications

- Portable carpet extraction machines, commercial extractors, and truckmount auxiliary electric power lines.
- Commercial electric pressure washers, high-pressure washing rigs, and inline volcano water heaters.
- Dual-cord power joiners, step-up electrical inverters, and 230V/240V conversion adapters.
- Compatible with Clean Storm 6720 cleaning units, Clean Storm Volcano 2000W inline heaters, and 6-2300-H carpet cleaning machines.
- Industrial floor restoration, air movers, dehumidifiers, construction job sites, and heavy power tool operations.

Specifications

Clean Storm 10-0860, Heavy-Duty 25 ft 12/3 SJTW Lighted Power Extension Cord 15A 125V, GTIN 661899102178

Brand
Clean Storm

Part Number / Model
10-0860

Cable Length
25 Feet

Wire Gauge & Conductor
12 AWG, 3-Conductor (12/3)

Jacket Rating & Type
SJTW Hard Service Thermoplastic (Outdoor / Weather-Resistant)

Conductor Material
100% Soft-Drawn Bunch-Stranded Copper

Voltage Rating
125 Volts AC

Amperage Rating
15 Amps Continuous Load

Plug / Receptacle Type
NEMA 5-15P 3-Prong Grounded Plug to Lighted NEMA 5-15R Receptacle

Indicator Light
Illuminated Female Receptacle Power Status Light

Certifications
UL / cUL Listed

Tips and Additional Information
To maximize the lifespan of your heavy-duty power extension cord, ensure electrical connections are clean and fully seated before turning on high-draw equipment. Always uncoil the entire 25 ft length prior to operation to allow proper heat dissipation and prevent thermal buildup. Inspect the plug blades, ground pin, and outer SJTW jacket before each use for signs of mechanical wear, cuts, or strain relief separation. When operating high-amp equipment like carpet extractors or pressure washers on long extension runs, use 12 AWG heavy-duty cords to prevent excessive voltage drop, which can trip circuit breakers or damage electric motor windings. Store cords clean, dry, and neatly coiled using an over-under technique to avoid internal conductor twisting.
Frequently Asked Questions
Q: What does the 12/3 SJTW rating mean?
A: "12/3" indicates 12-gauge wire size with 3 internal conductors (hot, neutral, and ground). "SJTW" specifies a Junior Hard Service cable (300V rated) with a Thermoplastic jacket designed for Weather/outdoor use.
Q: Why is a 12-gauge power cord required for carpet cleaning equipment and pressure washers?
A: Commercial equipment draws high continuous current (up to 15A). Thinner cords like 14 or 16 gauge cause severe voltage drops over distance, leading to reduced motor efficiency, dangerous overheating, and potential motor failure.
Q: Is this extension cord safe for outdoor use in sub-freezing temperatures?
A: Yes. The specialized SJTW jacket incorporates cold-weather insulation compounds formulated to remain pliable and resist cracking in freezing conditions.
Q: How do I know if power is reaching the end of the extension cord?
A: The female outlet end features an integrated clear molded housing with a light indicator that illuminates automatically when live AC voltage is present.
Warranty & Safety Information
This product is covered by a standard manufacturer limited warranty against defects in materials and workmanship under normal commercial use. Warranty coverage is void if the cord is subjected to severe mechanical damage, cuts, crushed jackets, modified or altered plug ends, cut ground pins, or operated continuously beyond its specified rating of 15 Amps and 125 Volts. Always operate with grounded 3-prong outlets protected by appropriate circuit breakers or GFCI receptacles. Never submerge power connections in water or operate electrical equipment in standing water without proper ground-fault protection.
