Model Number: E573

Heater Thermostat Miniature Auto Reset 86317510 Mytee E573 Sandia 10-0814 Rotovac TE206212

Manufacturer: Clean Storm

Heater Thermostat Miniature Auto Reset 86317510 Mytee E573 Sandia 10-0814 Rotovac TE206212

Mini disk thermostat sensor. This unit does NOT have the reset button in the middle. This is a "normally closed circuit" set to turn off (open the circuit) the electricity at 190 degrees on the outside of the heater. This means the water is about 205 degrees on the inside of the heater.

115 volts.

Used in most brands of extractors including Mytee, Ninja, Diamondback, Prochem, Shazaam, PowerFlite, Jamco, TMI, Namco, Chemtex, Rotovac, Prospector, and more...

We recommend that if you have a push button resettable thermostat that you replace it with an automatic one. Many machines come with one automatic and one push button. The machines perform better in the long run if both are automatic.

Compare to current or past OEM associations:

Windsor 86317510
Prochem 8.631-751.0
Mytee E573
130693, 130692
Sandia Plastic 10-0814
Hydro Force PME525
MYE573
MYPE573
Rotovac TE206212
MP-100814-EA
1644-2341
PKLK-25.83
Powrflite PX158
325862092309

This requires that the solderless connections be replaced.

Please note it is NOT OK to use 12 volt rated automotive connectors made out of vinyl.

You must use nylon connectors instead rated for 120 volts.

Using the wrong connections can cause your machine to catch on fire!
