Superior Carpet Wand Performance for Truckmounts

When designing a new product, we look at how our product can help our customers perform better and be more efficient. The Evolution carpet wand's innovative design helped to increase the performance of our portable carpet extractors, so the next logical step was to create the Evolution TM designed specifically for use with truckmounts.

Customer input has always been important to us in the design phase of a product. We let several professional carpet cleaners and testing facilities use this new carpet wand for many hours so we could gain valuable incite in the final design of this new carpet wand.

The Evolution TM was designed using the same laminar airflow design as the original, only in a bigger model of wand made specifically to work with truckmount cleaning systems.

Using a 2" vacuum tube, this wand connects directly to the 2" vacuum hose of most truckmounts with no need for reducing couplers that limit performance. A wide 16" head helps to increase productivity by covering more square feet per hour. At only 8.8 lbs, the Evolution TM helps to reduce fatigue on the cleaning technician

The custom glide holder is rotationally molded into the head for an airtight fit of

the custom glide that provides smooth operation on nearly any type of carpeted surface. Most importantly, the laminar air flow design delivers superior water recovery by streamlining airflow and 6 spray jets provide optimum coverage and cleaning power.

U.S. Products takes carpet wand design to the next level with the Evolution. The Evolution carpet wand is light, durable, and more efficient than any other wand on the market today! Through scientific testing, the Evolution was designed to smooth airflow and boost water recovery performance. The rotationally molded head and aircraft aluminum tube combine to make a carpet wand that is about half the weight of most stainless steel carpet wands. Replaceable air tight Delrin® acetal glide and ergonomic design allow effortless glide across any type of carpet.
