Clean Storm 022102074215, 1000 Watt Water Pail & Bucket Heater, AX28

Manufacturer: Clean Storm

Clean Storm 022102074215, 1000 Watt Water Pail & Bucket Heater, AX28

Description

The Clean Storm 1000 Watt Immersion Water Bucket Heater (AX28) is an essential tool designed to quickly heat water, dye, or cleaning solutions for optimal cleaning results. Engineered for maximum safety, this heavy-duty immersion heater features a preset, non-adjustable internal thermostat that heats water up to 180°F and automatically shuts off to virtually eliminate fire hazards if the water boils dry.

Built with a durable stainless steel guard, the heater protects both the heating element and your containers, allowing safe operation in standard 5-gallon plastic pails without melting or damaging the bucket. It features a heavy-duty 6-foot cord, drawing 8.33 amps on a standard 120V household circuit. Backed by a 1-year warranty, it is ideal for commercial cleaning, carpet restoration, and various industrial or workshop applications.

Usage & Safety Guidelines: The heating element must be fully submerged in water during operation. Do not place this heater directly into the fresh water tank of a carpet extraction machine. As water depletes, the exposed heating element will burn out and cause the remaining water temperature to exceed the safe 140°F seal threshold for carpet machine water pumps. Always heat water in a separate bucket and mix with cool water as needed to ensure temperatures do not exceed 140°F before pouring into your equipment tank.

Features

- High-Efficiency Heating: 1000 Watts of power rapidly heats water, dye, or cleaning chemical solutions.
- Built-In Thermostat: Non-adjustable automatic thermostat preset to maintain water temperature around 180°F.
- Safety Immersion Design: Engineered to shut down safely in the event water boils dry, preventing fire hazards.
- Stainless Steel Guard: Protective cage around the element prevents contact with bucket walls and prevents burn damage to 5-gallon plastic pails.
- Extended Reach: Comes equipped with a grounded 6-foot power cord.
- Commercial Grade: Perfect for professional carpet cleaners, painters, detailers, and job-site use.
