Model Number: F411

Drieaz F411 LGR 3500i Industrial Restoration Dehumidifier 110133 Freight Included (only 1 left at this price) GTIN 847136000111

Manufacturer: Drieaz

Dri-Eaz F411 LGR 3500i Industrial Restoration Dehumidifier - 115V
Part Number: F411 / 110133
GTIN: 847136000111
Freight Included - Commercial delivery with dock or forklift recommended.
High-Capacity LGR Dehumidifier for Restoration, Construction & Rental Fleets
The Dri-Eaz LGR 3500i is a professional low-grain refrigerant dehumidifier built for demanding water damage restoration, construction drying, and large-area humidity control. With up to 170 pints per day at AHAM and only 10.5 amps draw, this unit delivers high drying performance from a standard 115 volt outlet.

- 170 pints/day AHAM water removal at 80°F / 60% RH
- Up to 240 pints/day max at high humidity conditions
- 400 CFM process airflow
- 115 volt, 10.5 amp operation
- Digital i-Series controls with plain-English messages
- Displays inlet and outlet temperature and relative humidity
- Automatic humidistat operation
- Rugged rotomolded polyethylene housing
- Integrated wheels and handle for jobsite transport
- Uses Dri-Eaz F421 3M HAF filter

Why Choose the LGR 3500i?
The LGR 3500i is designed for restoration contractors who need large-capacity water removal without moving to a higher-voltage machine. The i-Series control panel helps technicians monitor drying conditions, run time, inlet/outlet temperature, humidity levels, defrost status, and system messages without relying on confusing error codes.

Model
Dri-Eaz LGR 3500i

Part Number
F411 / 110133

Voltage

Drieaz F411 LGR 3500i Industrial Restoration Dehumidifier 110133 Freight Included (only 1 left at this price) GTIN 847136000111

115V

Amp Draw
10.5 amps

Water Removal - AHAM
170 pints/day at 80°F / 60% RH

Maximum Water Removal
Up to 240 pints/day

Airflow
400 CFM

Filter
3M HAF Filter, Dri-Eaz F421

Housing
Rotomolded polyethylene

Drain Hose
40 ft.

Power Cord
25 ft. detachable cord

Approx. Weight
160-165 lbs.

Best Applications

- Water damage restoration
- Flood drying

Steambrite Supply

Drieaz F411 LGR 3500i Industrial Restoration Dehumidifier 110133 Freight Included (only 1 left at this price) GTIN 847136000111

- Construction drying
- Rental fleet use
- Large room humidity control
- Drying carpet, pad, drywall, wood flooring, contents, and structural materials

Freight Delivery Notice
This is a large commercial restoration machine and normally ships by truck freight. A commercial delivery address with a forklift or loading dock is recommended. If delivery is to a residence, farm, church, school, military base, limited-access location, or any site without a forklift or dock, liftgate and/or appointment delivery fees may apply.
Important Notes

- Specifications are subject to factory change without notice.
- Images are for reference only. Orders are fulfilled by the part number listed.
- Remote monitoring accessories, ducting, cleaning chemicals, and filters are sold separately unless specifically stated.

Frequently Asked Questions
Is the Dri-Eaz LGR 3500i a 115 volt unit?
Yes. This model is listed as a 115 volt unit drawing approximately 10.5 amps.
How much water can it remove?
The LGR 3500i is rated at 170 pints per day at AHAM test conditions and up to 240 pints per day in higher humidity conditions.
What filter does it use?
It uses the Dri-Eaz F421 3M HAF filter.
Is this good for professional restoration work?
Yes. This is a commercial low-grain refrigerant dehumidifier designed for water damage restoration, construction drying, and rental use.

LGR 3500i
Supersize your dehumidification

Delivering 170 pints at AHAM at only 10.5 amps, the LGR 3500i takes dehumidification to new heights. Built with the same restoration-ready, easy-to-transport design as the industry-leading 2800i, the 3500i delivers supersized performance and reliability. The 3500i is built for the tough environments found in water damage restoration, construction, and rental use. The rugged rotomolded housing and durable construction make this Dri-Eaz dehumidifier the number one choice.

Product Features

Steambrite Supply

Drieaz F411 LGR 3500i Industrial Restoration Dehumidifier 110133 Freight Included (only 1 left at this price) GTIN 847136000111

- Groundbreaking water removal rate – 170 pints at AHAM
- Displays inlet and outlet temperature and RH for easy monitoring
- Digital control panel with plain-English system messages, not codes.
- Wireless remote monitoring capable. Track operating conditions from any Internet connection with the HygroTrac Remote Monitoring System (purchased separately).
- Rugged Dri-Eaz rotomolded housing is easy to maintain and won't mar furnishings.

Research and Resource:
Commercial and Industrial Dehumidifier Comparison Chart

Dry Smart, Dry Fast

Dri-Eaz dehumidifiers are well known for their market-leading performance, durability and reliability, as well as their easy maintenance and long service life. In 2009, we introduced a unique, powerful control panel and sophisticated internal sensors with our new line of i-Series dehus. You first saw these in the LGR 2800i and 3500i, then the 7000XLi and now the Revolution LGR. It is this patented control system that truly sets Dri-Eaz dehumidifiers apart.

Benefits to Customers
The i-Series control panel makes monitoring jobs easier and ensures more efficient drying.

Customer benefits include:

* Easier documentation for drying jobs
* Optimized drying across the full range of conditions
* More accurate information to help guide equipment use

The information in this email will help you and your team highlight the benefits of i-Series control panels with your customers. It's the feature that truly differentiates Dri-Eaz dehumidifiers from all other competitive products on the market.

How It Works

The controller uses data from the onboard RH and temperature sensors to deliver maximum performance in all operating conditions.

Drieaz F411 LGR 3500i Industrial Restoration Dehumidifier 110133 Freight Included (only 1 left at this price) GTIN 847136000111

This technology allows Dri-Eaz dehumidifiers to deliver maximum water removal throughout the restoration process. Whether it is the high humidity and cooler temperatures typically found at the beginning of the job or the drier, warmer conditions near the end of the job, i-Series dehumidifiers remove as much water as possible in all conditions automatically and with no user intervention.

Because the built-in sensors are constantly in the airstream, they are always acclimatized. This saves time compared to hand-held meters, which can require 10-15 minutes to acclimate. In addition, the data gathered by the sensors is automatically displayed on the illuminated screen for convenient viewing at a glance.

Dri-Eaz designed the control panel to sit in a protected recess within the housing and added rugged membrane switches. This guards against accidental damage and prevents unintended setting changes. Users can easily switch the system to humidistat mode for specialty environmental control, and access a variety of system data, including total run time, plain language error messages and diagnostic information. The panel can be set to display in English, Spanish, French or German.

i-Series Control Panel:
Enhanced Dri-Eaz Technology for Superior Dehumidifier Performance and Monitoring Efficiency

Clear Messaging for Improved Equipment Operation

* Inlet/outlet temp and RH

Drieaz F411 LGR 3500i Industrial Restoration Dehumidifier 110133 Freight Included (only 1 left at this price) GTIN 847136000111

* Job hours and reset
* Life hours
* Coil/evaporator temp
* Defrost cycle (shows when defrost is in progress)
* Humidistat mode (runs until target RH level is established)
* Plain language system messages for easy troubleshooting

For superior performance, easy monitoring and legendary reliability, more and more customers are choosing the i-Series dehumidifiers from Dri-Eaz.
