Clean Storm 32044, 3/8" Male NPTF x 5/8" Hose Barb Forged Brass 90Â° Elbow, 32-044

Model Number: 32044

Clean Storm 32044, 3/8" Male NPTF x 5/8" Hose Barb Forged Brass 90Â° Elbow, 32-044

Manufacturer: Clean Storm

Clean Storm 32044, 3/8" Male NPTF x 5/8" Hose Barb Forged Brass 90° Elbow, 32-044

Description

The Clean Storm 32044 is a heavy-duty, forged brass 90-degree elbow fitting engineered for reliable, leak-free fluid and air connections. Featuring a 3/8" Male NPTF thread on one end and a 5/8" Hose ID barb on the other, this versatile elbow provides a secure right-angle directional change in tight plumbing, pneumatic, and industrial applications. Crafted from high-grade CA377 forged brass, it delivers superior structural strength and exceptional resistance to corrosion compared to standard cast fittings.

Note: These hose barb fittings are intended for use with a standard hose clamp, similar type clamp, or a crimped ferrule to ensure a secure, pressure-rated seal.

Buy More, Save More volume pricing available on bulk orders.

Key Features

- Forged Brass Construction: Manufactured from CA377 forged brass for enhanced durability, higher density, and elimination of porosity defects.
- Right-Angle Design: 90-degree elbow configuration allows for clean routing of hoses in tight or confined spaces without kinking.
- Secure Barb Grip: Precision-machined 5/8" hose barb ensures tight retention when paired with standard clamps or crimped ferrules.
- NPTF Thread Sealing: 3/8" Male NPTF tapered threads provide a tight, leak-resistant mechanical connection.
- Wide Thermal & Pressure Capability: Built to withstand harsh working conditions across extreme operating temperature ranges.

Product Specifications

Brand
Clean Storm

Part Number
32044 (32-044)

Steambrite Supply

Clean Storm 32044, 3/8" Male NPTF x 5/8" Hose Barb Forged Brass 90Â° Elbow, 32-044

Fitting Type
Forged 90° Hose Barb Elbow

Connection Size 1
3/8" Male NPTF

Connection Size 2
5/8" Hose ID Barb

Material
CA377 Forged Brass

Maximum Working Pressure
150 PSI

Temperature Range
-40°F to +160°F

Dimensional Tolerance
+/- .02 on all dimensions
